EIA Publications Directory 1985: A User's Guide

Energy Information Administration
National Energy Information Center
U.S. Department of Energy
Washington, DC 20585

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or necessarily reflecting any policy position of the Department of Energy or any other organization.

READEX best copy available

PREFACE

Since October 1977, the Energy Information Administration (EIA) of the U.S. Department of Energy has been responsible for collecting and publishing statistical data on energy production, consumption, prices, resources, and projections of supply and demand. *EIA Publications Directory: A User's Guide* provides access to EIA publications. The *Publications Directory*, published by the National Energy Information Center, is used by Federal agencies, State and local governments, libraries, energy-related organizations, and the general public. This issue contains abstracts of publications released by EIA for printing in 1985.

The *Publications Directory* lists all 1985 EIA publications by subject, title, and report number; it also explains how to order these publications. The abstracts of the publications are arranged by broad subject categories such as coal, petroleum, natural gas, and energy planning and policy. These categories are further divided. For example, the petroleum category is divided into reserves, drilling and production, processing petroleum products, and marketing and economics.

Information about EIA publications, products, and services may be obtained by writing to the National Energy Information Center, EI-20, Energy Information Administration, Forrestal Building, Washington, DC 20585, or by calling (202) 252-8800. EIA publications may also be accessed at Federal Depository Libraries or obtained by using the order forms in the back of this volume.

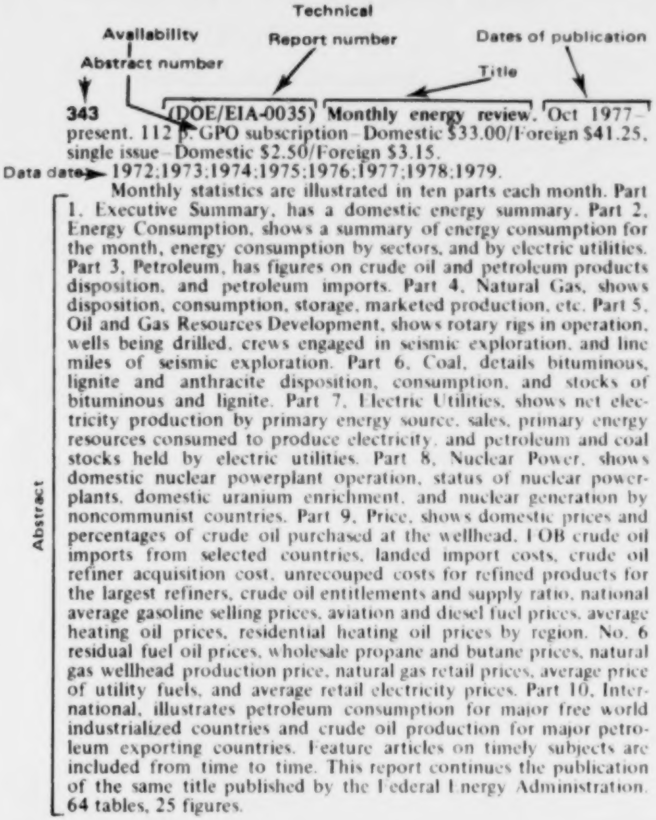
HOW TO USE THE PUBLICATIONS DIRECTORY

• Abstracts

The principal elements of an abstract entry for a typical journal title are illustrated below.



343 **(DOE/EIA-0035) Monthly energy review.** Oct 1977–present. 112 p. GPO subscription–Domestic $33.00/Foreign $41.25, single issue–Domestic $2.50/Foreign $3.15.
1972;1973;1974;1975;1976;1977;1978;1979.

Monthly statistics are illustrated in ten parts each month. Part 1. Executive Summary, has a domestic energy summary. Part 2, Energy Consumption, shows a summary of energy consumption for the month, energy consumption by sectors, and by electric utilities. Part 3, Petroleum, has figures on crude oil and petroleum products disposition, and petroleum imports. Part 4, Natural Gas, shows disposition, consumption, storage, marketed production, etc. Part 5, Oil and Gas Resources Development, shows rotary rigs in operation, wells being drilled, crews engaged in seismic exploration, and line miles of seismic exploration. Part 6, Coal, details bituminous, lignite and anthracite disposition, consumption, and stocks of bituminous and lignite. Part 7, Electric Utilities, shows net electricity production by primary energy source, sales, primary energy resources consumed to produce electricity, and petroleum and coal stocks held by electric utilities. Part 8, Nuclear Power, shows domestic nuclear powerplant operation, status of nuclear powerplants, domestic uranium enrichment, and nuclear generation by noncommunist countries. Part 9, Price, shows domestic prices and percentages of crude oil purchased at the wellhead, FOB crude oil imports from selected countries, landed import costs, crude oil refiner acquisition cost, unrecouped costs for refined products for the largest refiners, crude oil entitlements and supply ratio, national average gasoline selling prices, aviation and diesel fuel prices, average heating oil prices, residential heating oil prices by region, No. 6 residual fuel oil prices, wholesale propane and butane prices, natural gas wellhead production price, natural gas retail prices, average price of utility fuels, and average retail electricity prices. Part 10, International, illustrates petroleum consumption for major free world industrialized countries and crude oil production for major petroleum exporting countries. Feature articles on timely subjects are included from time to time. This report continues the publication of the same title published by the Federal Energy Administration. 64 tables, 25 figures.

• Indexes

Three indexes are provided for approaching the contents of this *Publications Directory:* the subject index, the report number listing, and the title index. Two of these indexes, the subject index and report number listing, are preceded by introductions that detail the organization of the index and the principles by which it was compiled. The reader is referred to these introductions for information not found in the index examples that follow.

• Subject Index

The subject index consisting of entries naming specific materials, objects, and processes is arranged alphabetically. Document titles, abstract number, and technical report number are arranged alphabetically under the entries.

SAUDI ARABIA
  Assessment of potential U.S. petroleum supply shortfalls, 1978, 73 (DOE/EIA-0102/24)
  International energy supply and demand, support documentation for the Administrator's Annual Report, 1977, 283 (DOE/EIA-0102/14)
SHORTWALL MINING
  Mining Equipment
    Coal mining equipment shipment survey, 46, (HCP/I5735-01)
SI UNITS
  Manuals
    Guide to selected metric (SI) units and symbols, 359 (DOE/EIA-0038)
SOLAR COLLECTORS
  See also CONCENTRATING COLLECTORS
    EVACULATED TUBE COLLECTORS

• Report Number Listing

Technical report literature is arranged by technical report number. The index includes information to determine where individual reports may be obtained.

(DOE/EIA–0129(80)) Main line natural gas sales to industrial users, 1980. Dec 1981. 63p. NEIC.

(DOE/EIA–0130) Natural gas monthly. Jan 1982–present. 1p. GPO subscription–Domestic $12.00/Foreign $15.00, single issue–Domestic $1.75/Foreign $2.20.

(DOE/EIA–0131(80)) Natural gas annual 1980. Feb 1982. 85p. GPO Stock No. 061-003-00238-2, $4.75.

• Title Index

The title index provides an alphabetical title approach to the publications as noted in the *EIA Publications Directory.* Both technical report number and abstract number are given.

CRUDE-OIL AND REFINED-PRODUCTS PIPELINE MILEAGE IN THE UNITED STATES, JANUARY 1, 1977 (DOE/EIA-0107) 96.

CURRENT U.S. PETROLEUM SITUATION AND SHORT-TERM SUPPLY/DEMAND OUTLOOK (DOE/EIA-0184/5)119.

DEMAND FOR WORLD COAL THROUGH 1995 (DOE/EIA-0184/8)43.

DEPTH AND PRODUCING RATE CLASSIFICATION OF DOMESTIC OIL RESERVOIRS, 1974 (DOE/EIA-0097)58.

DETERMINANTS OF REFINERY PLANT SIZE IN THE UNITED STATES (DOE/EIA-0102/45)83.

EIA ABSTRACTS

00 EIA PROGRAMS AND PRODUCTS

REFER ALSO TO CITATION(S) 54, 102

1 EIA publications directory 1984: a user's guide. (DOE/EIA—0149(84)) (Annual) Mar 1985. 132p. NEIC; NTIS DE85009131

1984.

Bibliographic information and abstracts for 97 Energy Information Administration (EIA) publications released for printing in 1984 are provided. The abstracts are arranged by broad subject category, such as coal, petroleum, natural gas, and energy planning/policy. A comprehensive subject index, a title index, and a report number listing for the publications are included. Each entry gives the title, report number, publication frequency, report date, number of pages, availability, and date of data coverage. Information on the availability of EIA data files, modeling programs, data collection forms, and EIA reports in microfiche is also provided.

2 Annual report to Congress 1984. (DOE/EIA—0173(84)) (Annual) Mar 1985. 88p. NEIC; NTIS DE85008104

1984.

The significant activities and publications of the Energy Information Administration (EIA) during 1984 are described. A general overview is first provided. The contributions of EIA's eight offices are then described in more detail. A section also discusses quality, integrity, and independence issues. Three appendixes list and describe EIA's data-gathering surveys, models, and publications.

3 EIA publications new releases. (DOE/EIA—0204) (Bimonthly) Oct 1979-1985. Issue (85/01), 36p. NEIC; NTIS DE85008104

1985.

The latest available Energy Information Administration (EIA) publications and upcoming reports are listed and described. Availability and ordering information is provided. News about the EIA and other items of interest to users of EIA publications are also included.

4 Energy information directory. (DOE/EIA—0205) (Semi-annual) Aug 1979-1985. Issue (85/1), 88p. NEIC

1985.

Various energy information offices within the Department of Energy (DOE) and other Federal agencies are listed. Entries are arranged by broad subject category, presenting the name of the office, the address/telephone number, the principal contact person, and a description of primary activities. A comprehensive subject index, name index, and organization charts for the DOE and the Energy Information Administration are also provided. In addition, three appendixes list State Energy Offices, State Energy Extension Services, and DOE Research and Development/Field Facilities. Each new edition supersedes the previous issue. Previous to the issue covering the first quarter of 1981, this publication was entitled "Energy Information Referral Directory." Previous to the first 1983 issue, this publication was issued quarterly. 2 figures.

5 Directory of energy data collection forms. Forms in use as of October 1984. (DOE/EIA—0249) (Semi-annual) Nov 1980-1985. Issue (84/2), 52p. NEIC; NTIS DE85015553

1984.

A listing of the energy information gathering forms approved for use by the Department of Energy on October 1, 1984, is provided. For each form, a descriptive abstract and the data collected are given. Also shown are the general energy sources and functions covered by the form; the previous form; the frequency of collection; the respondent categories; the reporting requirement; the legal citation; the resulting publications; and the name and telephone number of the collection manager. Indexes list forms by energy source and function; by resulting publication; and by respondent category. A listing of the public laws and Federal regulations cited is also provided.

6 Energy data contacts finder. (DOE/EIA—0259) (Semi-annual) Jan 1981-1985. Issue (84/2), 4p. NEIC

1984.

A listing of energy specialists by technical subject area is given for the Energy Information Administration. Specific data program areas and contacts are listed for alternate fuels, coal, electric power, natural gas, nuclear power, and petroleum products. In addition, contacts for information services (the National Energy Information Center), forecasting/analysis, and conservation/consumption are shown. This publication has been discontinued with this issue.

7 Directory of Energy Information Administration model abstracts. (DOE/EIA—0293(85)) (Annual) May 1985. 76p. NEIC; NTIS DE85013050

1985.

Extensive abstracts of Energy Information Administration (EIA) models active through September 1984 are presented. Brief statements regarding each model's title, acronym, purpose, and status are given, followed by more detailed information on characteristics, cases, and requirements. Sources for additional information are identified. Models are listed by major EIA office. Three appendixes list active models, major modeling systems/contributing models, and active models by type (basic, auxiliary, and developing). This report revises and updates "Applied Analysis Model Summaries" (DOE/EIA—0293).

8 EIA publications manual. Statistical graphs. (DOE/EIA—0465) (One-time) Apr 1985. 76p. NEIC

1985.

Guidelines to aid in resolving problems common to the presentation of data in statistical graphs are presented. The examples are intended not as inflexible specifications but rather as guides to the design of graphs. Types of graphs covered are simple line graphs, cumulative line graphs, bar/pie charts, histograms, statistical maps, scatter diagrams, and graphs for time series. Design criteria, examples, and appropriate use for each are discussed. A summary is provided, and references are included. Two appendixes present a glossary and provide technical notes. 3 tables, 24 figures.

01 COAL AND COAL PRODUCTS

0120 MINING

REFER ALSO TO CITATION(S) 12, 14, 15, 16

9 Coal data: a reference. (DOE/EIA—0064(84)) (Periodic) Jan 1985. 92p. GPO Stock No. 061-003-00421-1, Domestic $3.00/Foreign $3.75; NTIS DE85007271

1900-1983.

An overview covering all aspects of the coal industry is presented. The most recent data for the year 1983 are included, with some data series extending back to the year 1900. Covered in narrative text are deposits/resources/reserves, production/mining, preparation, transportation/storage/stocks, supply, consumption, coal/coke trade, new ways to use coal, and the history of U.S. coal. Detailed statistical tabulations are given for reserves, production/mining, supply/disposition, consumption, exports, and prices. Coal classifications and specifications are also provided. A glossary of coal terminology and related information, a bibliography, and a listing of sources of information on coal are included. 28 tables, 32 figures.

10 Coal production 1984. (DOE/EIA—0118(84)) (Annual) Nov 1985. 168p. GPO Stock No. 061-003-00462-8, Domestic $6.00/Foreign $7.50; NTIS DE86003135

1960-1984.

Detailed information on coal production is provided for the year 1984, with some data also given for 1983. Shown are coal production; number of mines; average mine price; productivity and employment; and recoverable reserves, productive capacity, and stocks. Some data are presented by county, State, Coal Producing District, and region. Other data are presented by coal group, coal rank, coal bed thickness, major coal bed, and mine production range. Explanatory notes and a glossary are included. Five appendixes provide data on the demonstrated reserve base of coal as of January 1, 1984; display annual trends since 1960; present data on 1983 coal preparation and shipments; provide reference tables and map; and provide a copy of Form EIA-7A, "Coal Production Report." The 1983 coal preparation and shipments data were collected on a supplemental survey to obtain detailed information about transportation, prices, quality, methods of loading coal at underground mines, overburden ratios/thicknesses at surface mines, and coal preparation. The last survey covering similar information was made in 1978. 87 tables, 16 figures.

11 Weekly coal production. (DOE/EIA—0218) (Weekly) Jan 1985. Issue (85/01), 4p. GPO subscription—Domestic $69.00/Foreign $86.25;Single issue—Domestic $2.00/Foreign $2.50

1984-1985.

Data on production of bituminous coal/lignite and anthracite are provided by State for the most recent 2 weeks, a corresponding week of the previous year, and the year-to-date for 1984 and 1985. Total U.S. production and the number of railroad cars loaded are also given. Supplemental issues present additional data on coal production, consumption, receipts, stocks, imports, exports, and prices. 3 tables, 1 figure.

0130 TRANSPORT AND HANDLING

REFER ALSO TO CITATION(S) 9, 16

12 Coal distribution. January-March 1985. (DOE/EIA—0125) (Quarterly) Apr 1985. Issue (85/1Q), 104p. GPO subscription—Domestic $15.00/Foreign $18.75;Single issue—Domestic $4.25/Foreign $5.31; NTIS DE 85014693

1981-1985.

U.S. coal distribution is reported for the most recent quarter of 1985; historical data for the same quarter of each year from 1981 through 1984 are also provided. Shown are distribution by: origin (Coal Producing District); destination (State, Canada, Mexico, and overseas); consumer category (electric utilities, coke plants, other industrial, residential/commercial, and transportation); method of transportation (railroad, water, truck, tramway/conveyor, and slurry pipeline); Census Region; and State. Coal production and purchases and distribution by secondary methods of transportation (tidewater piers, coastal ports, Great Lakes coal-loading docks, and rivers) are also reported. Explanatory notes describe the data collection form (Form EIA-6) and methodology; a glossary lists terms used; and two appendixes provide maps and a copy of Form EIA-6 with instructions. 57 tables, 5 figures.

13 Coal slurry pipelines: impact on coal markets. (DOE/EIA—0468) (One-time) Apr 1985. 68p. GPO Stock No. 061-003-00429-6, Domestic $2.50/Foreign $3.13; NTIS DE85010469

1984;1995.

Background information on coal slurry pipelines and their potential impact on the coal market is presented. This information is analyzed through the use of the Coal Supply and Transportation Model. An overview of coal slurry pipelines is provided, including a discussion of the technical aspects and existing/proposed coal slurry pipelines. Legislative issues are described, covering Federal eminent domain, the need for rights-of-way across Federal lands, and legislative proposals. The impact of coal slurry pipelines is analyzed, with discussions on the modeling approach, transportation rates, scenario descriptions/assumptions, "Annual Energy Outlook" forecasts, and pipeline selection process. An Executive Summary and bibliography are included. Two appendixes present information on the coal slurry pipeline rate methodology and provide a compendium of proposed coal slurry pipeline legislation. 14 tables, 4 figures.

0150 MARKETING AND ECONOMICS

REFER ALSO TO CITATION(S) 9, 11, 12, 13, 92

14 Quarterly coal report. (DOE/EIA—0121) (Quarterly) Jul 1985. Issue (85/1Q), 116p. GPO subscription—Domestic $17.00/Foreign $21.25;Single issue—Domestic $4.75/Foreign $5.94; NTIS DE 85014798

1960-1990;1995.

Comprehensive information about U.S. coal production, consumption, exports, imports, receipts, and stocks is provided for the most recent quarter of 1985, with aggregated quarterly data for previous years from 1980 also given. To provide a complete picture of coal supply and demand, historical information and forecasts have been integrated in this report. Data are reported by Coal-Producing Region and State, Census Region, end-use sector (electric utilities, coke plants, other industrial, and residential/commercial), and Standard Industrial Classification. Prices are also given for exports, imports, and receipts data. Explanatory notes, a discussion of data sources, and a glossary are provided. Appendix A presents detailed coke data; Appendix B displays historical trends and projections for each year from 1960 through 1990 and the year 1995; and Appendix C provides reference tables and maps. A section of highlights presents extensive coverage of recent developments. 57 tables, 13 figures.

15 Annual outlook for U.S. coal 1985. With projections to 1995. (DOE/EIA—0333(85)) (Annual) May 1985. 56p. GPO Stock No. 061-003-00434-2, Domestic $2.00/Foreign $2.50; NTIS DE85011973

1860-1995.

Coal projections from the "Annual Energy Outlook" (DOE/EIA—0383(84)) are highlighted and discussed. Current issues, including Federal coal leasing, transportation rates, imports, mining labor productivity, and acid deposition, are also discussed. In addition, some recent events of concern to the coal industry are examined. An additional chapter in this year's report analyzes the history of coal consumption in the industrial sector (excluding coke plants). An historical overview is first presented, followed by a detailed examination of future trends in coal supply and demand. A bibliography is also included. 18 tables, 5 figures.

16 **Annual prospects for world coal trade 1985. With projections to 1995. (DOE/EIA—0363(85))** (Annual) May 1985. 72p. GPO Stock No. 061-003-00432-6, Domestic $2.50/Foreign $3.13; NTIS DE85011524

1973-1984;1990;1995.

A detailed examination of the projections for world coal trade contained in the "Annual Energy Outlook" (DOE/EIA—0383(84)) is presented. An overview of world coal trade is first presented, followed by separate chapters on the coal supply and demand chain, world import demand, and projections for the years 1990 and 1995, with conclusions also provided. The assumptions concerning the growth of world demand for metallurgical and steam coal are examined. U.S. exports and world trade are also analyzed for two other cases, low-demand and high-demand. An appendix presents supplemental tables on steam and metallurgical coal flows from the exporting to the importing countries and regions for the time period 1980-1983. An Executive Summary and glossary are also included. 26 tables, 3 figures.

02 PETROLEUM

0201 RESERVES

REFER ALSO TO CITATION(S) 85

17 **U.S. crude oil, natural gas, and natural gas liquids reserves. 1984 annual report. (DOE/EIA—0216(84))** (Annual) Sep 1985. 112p. GPO Stock No. 061-003-00454-7, Domestic $3.75/Foreign $4.69; NTIS DE86000658

1976-1984.

Proved reserves of crude oil, natural gas, and natural gas liquids in the United States are reported as of December 31, 1984. Reserves data are displayed by State and State subdivision, with U.S. totals. A national summary is given, along with a discussion of areas of notable developments in the industry during 1984. Shown and discussed are crude oil proved reserves and production, reserves in nonproducing reservoirs, and indicated additional reserves; natural gas proved reserves and production, reserves in nonproducing reservoirs, and commitment status; natural gas liquids proved reserves, production, and processing at plants; and lease condensate proved reserves and reserves in nonproducing areas. Natural gas reserves data are shown separately for nonassociated, associated-dissolved, total dry, and total natural gas. Additional data are shown for intrastate and interstate natural gas pipeline contracts and commitment status. Exploratory and development well completion data are provided in the summary. These estimates are based upon an analysis of data filed on Form EIA-23, "Annual Survey of Domestic Oil and Gas Reserves," and on Form EIA-64A, "Annual Report of the Origin of Natural Gas Liquids Production." A glossary and references are included. Five appendixes summarize data collection, discuss statistical considerations, describe estimation methodologies, present historical U.S. and State statistics (1977-1984), and provide selected maps. 17 tables, 9 figures.

18 **Petroleum resources of South America. Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, and Peru. (DOE/EIA—0467)** (One-time) Oct 1985. 340p. GPO Stock No. 061-003-00456-3, Domestic $12.00/Foreign $15.00; NTIS DE86002042

1905-2100.

The status of the known and undiscovered recoverable crude oil and natural gas resources of seven South American countries is analyzed. Countries are Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, and Peru. This is the 11th report in the Foreign Energy Supply Assessment Program (FESAP) series. For each country, the area of interest, exploration/development, well drilling statistics, crude oil production/reserves/resources of known deposits, and geological basins are described. Crude oil quality and markets are also discussed. South America's ultimately recoverable petroleum resources are assessed. A detailed historical geology and a description of sedimentary basins are presented. Detailed historical oil field production data through the year 1982 are tabulated for each country. Supplementary information and a bibliography are also provided. 82 tables, 59 figures.

0203 DRILLING AND PRODUCTION

REFER ALSO TO CITATION(S) 18, 23, 26, 27, 28, 53, 85, 90

19 **Costs and indexes for domestic oil and gas field equipment and production operations 1984. (DOE/EIA—0185(84))** (Annual) May 1985. 176p. GPO Stock No. 061-003-00433-4, Domestic $6.50/Foreign $8.13; NTIS DE85011591

1982-1984.

Estimated costs and cost indexes for domestic oil and gas field equipment and production operations are provided for 1984. The information for oil field operations is given for four depth categories and six onshore and one offshore areas. Data are also calculated for waterflood equipment and operations in West Texas. The information for gas field operations is given for five depth and six onshore areas. Some data for gas fields are also given for different production rates. Costs are also shown for 1983, with cost indexes (1976=100) calculated for 1982 and 1983. Narrative sections discuss the results and the indexing procedure. 139 tables, 14 figures.

20 **Indexes and estimates of domestic well drilling costs 1984 and 1985. (DOE/EIA—0347(84-85))** (Annual) Nov 1985. 140p. GPO Stock No. 061-003-00461-0, Domestic $4.75/Foreign $5.94; NTIS DE86002785

1974-1985.

Estimated well drilling and completion costs and indexes for 13 U.S. onshore areas are presented. Estimates are made for all wells, oil wells, gas wells, and dry holes. The procedure for making these estimates utilizes the historical drilling cost data published annually by the Joint Association Survey in conjunction with other specified cost variables. Individual cost and index tabulations are shown by geographical area, type of well, and representative depth, along with a 7-year plot of the drilling costs for the most frequently drilled depth during 1984. Indexes (1976=100) are given for the years 1984 and 1985, with the annual percentage change also shown for each year. Narrative text discusses the model, drilling industry review, drilling cost indexing procedure, and conclusions. Five appendixes provide supplemental information. 71 tables, 106 figures.

21 **Oil and Gas Field Code Master List 1984. (DOE/EIA—0370(84))** (Annual) Jan 1985. 668p. GPO Stock No. 061-003-00418-1, Domestic $19.00/Foreign $23.75; NTIS DE85006327

1984.

A standardized code for all oil and/or gas fields in the United States is provided. The methodology used to assign field codes and the rules for the standardization of field names are also discussed. The User's Guide and glossary provide additional information for full utilization of this listing. The Field Code Master List is organized by State. Each field name entry presents the field code, field name, geographical information, field discovery year, field type, and other related information. The Field Code Index is an abbreviated listing, organized by field code. These field names and codes are used by respondents to the following surveys: Form FERC-15, "Interstate Pipeline's Annual Report of Gas Supply," Form EIA-23, "Annual Survey of Domestic Oil and Gas Reserves," Forms FPC 8/EIA-191, "Underground Gas Storage Report," and Form FERC 542-PGA, "Gas Pipeline Rates: Purchased Gas Adjustments (PGA) Filings." 4 tables, 9 figures.

22 Oil and Gas Field Code Master List 1985. (DOE/EIA—0370(85)) (Annual) Dec 1985. 598p. GPO Stock No. 061-003-00465-2, Domestic $20.00/Foreign $25.00

1985.

A standardized code for each oil and/or gas field in the United States is provided, along with details both on the methodology used to assign field codes and on the rules for standardization of field names. A user's guide and glossary are also included. The Field Code Master List is organized by State, with fields listed alphabetically within each State. Each field name entry contains the field code, field name, geographical information, discovery year, field type, and other related information. The Field Code Index is an abbreviated listing, sorted by field code. The use of standardized field names and codes is required on survey forms. These survey forms are Form EIA-23, "Annual Survey of Domestic Oil and Gas Reserves," FERC Form-15, "Interstate Pipeline's Annual Report of Gas Supply," and FPC Form-8/Form EIA-191, "Underground Gas Storage Report." 4 tables, 9 figures.

23 Petroleum supply monthly. (DOE/EIA—0109) (Monthly) Mar 1985. Issue (85/01), 124p. GPO subscription—Domestic $46.00/Foreign $57.50;Single issue—Domestic $3.75/Foreign $4.69; NTIS DE 85009222

1973-1985.

Summary data on U.S. supply, disposition, and stocks of crude oil and petroleum products are reported for each year from 1973 through 1985, with monthly data shown from 1983 through the most recent month of 1985. Detailed statistics are provided for the most recent month of 1985. Shown are supply, disposition, and stocks for each Petroleum Administration for Defense (PAD) District with U.S. totals; production of crude oil and lease condensate by PAD District and State; natural gas processing; refinery operations by PAD District; imports/exports; stocks; transportation between PAD Districts; and heavy fuel oils by sulfur content. A feature article, glossary, maps, and explanatory notes, discussing the data collection methodology are included. 42 tables, 12 figures.

24 Performance profiles of major energy producers 1983. Volume 1 analysis of trends. (DOE/EIA—0206(83)/1) (Annual) Feb 1985. 260p. GPO Stock No. 061-003-00422-9, Domestic $7.50/Foreign $9.38; NTIS DE85007529

1974-1983.

Financial information and other measures of energy-related business efforts and results for 25 major energy-producing companies are compared on a uniform, segmented basis. This information is developed from Form EIA-28, "Financial Reporting System," the purpose of which is to examine year-to-year developments in the operations of these companies on a corporate level, by major line of energy business, and by major functions within each line-of-business. This report presents data collected for the year 1983; important trends over the time period 1974-1983 are also featured. Covered are key financial trends, taxation, domestic petroleum developments, domestic resource developments, foreign petroleum developments, and coal/nuclear/other energy. A glossary and an executive summary are also included. Eight appendixes describe the general structure of the reporting format of Form EIA-28, describe the selection of reporting companies, present detailed statistical tables, and provide other information. An accompanying volume provides detailed statistical tables for the time period 1977-1983. 109 tables, 34 figures.

25 Performance profiles of major energy producers 1983. Volume 2 statistical tables. (DOE/EIA—0206(83)/2) (Annual) Feb 1985. 92p. GPO Stock No. 061-003-00423-7, Domestic $3.25/Foreign $4.06; NTIS DE85007419

1977-1983.

Financial and operating information, developed from the Energy Information Administration's Form EIA-28, "Financial Reporting System" (FRS), on the activities of the 25 major energy-producing companies is presented. FRS collects financial data on revenues and expenses, assets and liabilities, and sources and uses of funds. This second volume presents aggregate annual data for the companies for the time period 1977 through 1983. The aim of FRS is to establish a system of uniform segmented reporting for firms having different functional and management structures; this volume makes possible comparisons on a consistent basis over an extended time period. Numbers in the table titles refer to the schedule in Form EIA-28 from which the data are drawn; the tabular presentation follows the format and content of Form EIA-28. In using this volume, the glossary and six appendixes contained in the first volume of this report should be consulted. These appendixes discuss the survey frame, collection methods, data adjustments, and accounting issues. The first volume presents an analysis of developments in 1983. 29 tables.

26 Weekly petroleum status report. (DOE/EIA—0208) (Weekly) Jan 1985. Issue (84/52)(85/01), 36p. GPO subscription—Domestic $55.00/Foreign $68.75;Single issue—Domestic $1.50/Foreign $1.88

1978;1980-1984.

Current information on the petroleum supply situation in the United States is given for the most recent week and month. Some data are also given by month and year from 1982. Shown are the U.S. petroleum balance sheet; refinery activity; stocks; imports; products supplied; and prices. Refinery data cover input, utilization, and production. Data on stocks are given for crude oil and major product (gasoline, distillate fuel oil, and residual fuel oil) and by Petroleum Administration for Defense District. Data on prices are refiner acquisition cost of crude oil; retail selling prices for motor gasoline and residential heating oil; world crude oil prices; and spot market product prices. Strategic Petroleum Reserve data are shown when appropriate. Additional information on heating degree days and on natural gas in underground storage is provided. Five appendixes discuss survey design and estimation methods for weekly data; interpretation and derivation of average inventory levels; projection of product supplied from the "Short-Term Energy Outlook" (DOE/EIA—0202); changes in the data series; and calculation of world oil prices. A glossary and list of data sources are also provided. 18 tables, 17 figures.

27 Petroleum supply annual 1984. Volume 1. (DOE/EIA—0340(84)/1) (Annual) Jun 1985. 152p. GPO Stock No. 061-003-00437-7, Domestic $5.00/Foreign $6.25; NTIS DE85013235

1973-1986.

Information on the supply and disposition of crude oil and petroleum products is provided for the year 1984. This volume contains 2 sections: petroleum supply summary and refinery capacity. A second volume provides final monthly data on petroleum supply. Summary supply data are presented for each year from 1973 through 1984, with monthly data for 1982-1984. Detailed supply tabulations are given for supply and disposition; production; natural gas processing; refinery operations; imports and exports; stocks; transportation; and residual fuel oil by sulfur content. Detailed refinery capacity tabulations (as of January 1, 1985) are given for listings of facilities and associated capacities in each State; summaries of corporate refinery capacities; refinery storage facilities; refinery shutdowns during 1984; refinery sales and mergers since

1981; and projected changes in input and production during 1985 and 1986. 52 tables, 12 figures.

28 Petroleum supply annual 1984. Volume 2. (DOE/EIA—0340(84)/2) (Annual) Jun 1985. 440p. GPO Stock No. 061-003-00438-5, Domestic $15.00/Foreign $18.75; NTIS DE85013652

1984.

Final petroleum supply statistics for each month of 1984 are presented, replacing data previously published in the "Petroleum Supply Monthly" (DOE/EIA—0109). Covered are national statistics; supply and disposition of crude oil and petroleum products; production of crude oil and lease condensate; natural gas processing; refinery operations by Petroleum Administration for Defense (PAD) District; imports and exports; stocks; transportation; residual fuel oil by sulfur content; and stocks (new basis). Data are shown by PAD District refining district, State, or country, as appropriate. Four appendixes are included and present definitions, explanatory notes, and maps. 29 tables.

29 Petroleum marketing monthly. (DOE/EIA—0380) (Monthly) Mar 1985. Issue (85/01), 156p. GPO subscription—Domestic $47.00/Foreign $58.75;Single issue—Domestic $4.25/Foreign $5.32; NTIS DE 85009810

1978-1985.

Petroleum product marketing data are reported for the United States, Petroleum Administration for Defense (PAD) Districts, and each State for the current month of 1985, the previous month, and the corresponding month of 1984. Some data are also summarized for each year from 1978 through 1984. Shown for individual petroleum products are sales prices, sales volumes, percentages of sales, and first sales for consumption. Data are given by type of seller (major refiner, other refiner/gas plant operator, and reseller) and by type of sale (sales to end users and sales for resale). Extensive new crude oil price tables are introduced in the February 1985 issue. Feature articles on current topics appear periodically. Standard errors and survey response percentages are also presented. Explanatory notes, a glossary, and a product guide to tables are also included. Forms EIA-782A, EIA-782B, and EIA-782C are used to collect these data; the collection methodology is described in the explanatory notes. 65 tables, 16 figures.

30 International energy prices 1980-1984. (DOE/EIA—0424(84)) (Annual) Aug 1985. 176p. GPO Stock No. 061-003-00444-0, Domestic $6.50/Foreign $8.13; NTIS DE85015924

1980-1984.

Quarterly energy price and tax information from 1980 through 1984 for the United States and nine major energy-consuming countries is presented. Prices and taxes are given for petroleum products, natural gas, electricity, and coal in both U.S. currency/units of measure and national currencies/metric units of measure. Sectors are household, industrial, transportation, and electricity generation. A detailed comparison of prices and taxes is also provided for specific sectors for diesel fuel, gasoline, light/heavy fuel oil, natural gas, electricity, and steam/metallurgical/residential coal. Other countries are Canada, France, West Germany, Italy, the United Kingdom, Sweden, Netherlands, Australia, and Japan. The primary objective of this report is to assemble these international data in common units of measure for end users. This report utilizes data that were collected for purposes other than energy price trend analysis. Definitions and detailed explanatory notes for each country, including sources of the data, are given in an appendix. Exchange rates and conversion information are also provided. 75 tables, 14 figures.

31 Profiles of foreign direct investment in U.S. energy 1983. (DOE/EIA—0466) (One-time) Feb 1985. 60p. GPO Stock No. 061-003-00425-3, Domestic $2.25/Foreign $2.81; NTIS DE85007652

1974-1983.

The changing patterns of foreign ownership interest in U.S. energy enterprises are examined. The involvement of foreign-affiliated U.S. companies in domestic petroleum/natural gas production, reserves holdings, refining/marketing activities, and coal production is profiled. In addition, information on foreign activity in the U.S. uranium industry is presented. A financial profile of U.S. energy companies that are foreign-affiliated is provided, with comparisons of 1982 and 1983 results. Capital and income flows in petroleum between the foreign owners and the foreign-affiliated U.S. companies as well as the international composition of ownership are also reported. In addition, recent acquisition of ownership interests in U.S. energy companies by foreign persons is summarized. An appendix lists completed foreign direct investment transactions in 1983.

32 Profiles of foreign direct investment in U.S. energy 1984. (DOE/EIA—0466(84)) (Annual) Dec 1985. 56p. NEIC

1977-1984.

The involvement of foreign-affiliated U.S. companies in domestic petroleum/natural gas production, reserves holdings, refining/marketing activities, and coal production in 1984 is examined. Information on foreign activity in the U.S. uranium industry is also presented. A financial profile of U.S. energy companies that are foreign-affiliated is presented with comparisons of 1983 and 1984 results. Capital and income flows in petroleum between the foreign owners and the foreign-affiliated U.S. companies as well as the international composition of ownership are reported. In addition, recent acquisitions of ownership interests in U.S. energy companies by foreign companies are summarized. 21 tables, 5 figures.

33 Domestic natural gas reserves and production dedicated to interstate pipeline companies 1984. (DOE/EIA—0167(84)P) (Annual) Aug 1985. 8p. NEIC

1963-1984.

Summary data on natural gas reserves and production of interstate pipeline companies are provided in this preliminary report to "Gas Supplies of Interstate Natural Gas Pipeline Companies" (DOE/EIA—0167(84)). Yearend dedicated reserves, change reserves, and production dedicated to interstate pipeline companies are shown for each year from 1963 through 1984. Additional data are subdivided for major and minor companies. These data are compiled from Form FERC-15, "Interstate Pipeline's Annual Report of Gas Supply." These data are subject to revision but are not expected to vary significantly from the final report. 4 tables.

34 Natural gas monthly. (DOE/EIA—0130) (Monthly) Mar 1985. Issue (85/01), 144p. GPO subscription—Domestic $56.00/Foreign $70.00;Single issue—Domestic $5.00/Foreign $6.25; NTIS DE 85008855

1973-1985.

Current data on natural and supplemental gas production, supply, consumption, disposition, storage, imports, exports, and prices in the United States are presented for each year from 1978 through 1984, with monthly data from 1983 through the most recent month. Consumption data are given by sector; production data are given by State; price data are given by metropolitan area; company-specific data are also presented. Explanatory notes, a discussion of data sources, and a glossary are included. Feature articles on current topics are published periodically. Three reports, previously published as separate annual reports, covering underground storage, imports/exports, and mainline sales to industrial users appear periodically. 23 tables, 5 figures.

35 **Natural gas annual 1983. Volume I. (DOE/EIA—0131(83)/1)** (Annual) Mar 1985. 220p. GPO Stock No. 061-003-00426-1, Domestic $7.00/Foreign $8.75; NTIS DE85008126

1930-1983.

Information on all aspects of the supply and demand of natural gas in 1983 is presented in a sequence that follows natural gas from production to end use. A brief overview of industry operations, with summary statistics, is first presented. Statistical tables are then grouped into major categories, including reserves, production, imports, exports, interstate movements, storage, consumption, and price. Consumption data by sector are given for each year from 1978 through 1983. Most data are shown by State. Substantial historical data covering the time period 1973-1982 are also presented. This report is generated from several independent data gathering systems. The core data for 1983 are collected by the mandatory Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition," and the voluntary Form EIA-627, "Annual Quantity and Value of Natural Gas Report." Two appendixes summarize data collection methodology and provide thermal conversion factors. A companion report, Volume II, provides detailed information on large end-use deliveries by Standard Industrial Classification Code for the time period 1979-1984. 39 tables, 11 figures.

36 **Natural gas annual 1983. Volume II. (DOE/EIA—0131(83)/2)** (Annual) Mar 1985. 248p. GPO Stock No. 061-003-00427-0, Domestic $7.50/Foreign $9.38; NTIS DE85008189

1979-1984.

Information on large end-use deliveries and their relationship to total deliveries of natural gas is presented, following natural gas from distributor to end use. This report is a companion to Volume I, which provides comprehensive coverage of the natural gas industry, from reserves through storage, supply/demand, and transport to price. Shown are deliveries to the top 20 industries; deliveries to large end users by Standard Industrial Classification Code; deliveries by the top 100 distributors; deliveries to large end users by industry and State; and deliveries to large end users by State, distributor, and customer. Time periods are the 5 heating years from 1979-80 through 1983-84. These data are derived from Form FERC-50, "Alternative Fuel Demand Due to Natural Gas Deficiencies Report," Schedule III, "Large End-Use Data," and the predecessor Form EIA-50, "Alternative Fuel Demand Due to Natural Gas Curtailments." The threshold for a large end user as defined by Form FERC-50 is a combined delivery/deficiency total of 100 million cubic feet or more of gas or gas equivalent for the heating year. An appendix summarizes data collection operations and report methodology. A glossary is also included. 5 tables, 5 figures.

37 **Natural gas annual 1984. Volume I. (DOE/EIA—0131(84)/1)** (Annual) Dec 1985. 272p. GPO Stock No. 061-003-00468-7, Domestic $9.50/Foreign $11.88

1967-1984.

Information on the production, reserves, imports, exports, interstate movements, storage, consumption, and price of natural gas is presented for 1984. Annual summary data on the quantity and average price of natural gas production at the State and national levels are provided, as well as total gas supply/disposition balances. Data on the quantity and price of natural gas consumption are shown for major end-use categories by State. Historical data covering the time period 1967-1983 are also provided. These data are derived from several independent data reporting systems. The core data for 1984 are gathered from Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition," and Form EIA-627, "Annual Quantity and Value of Natural Gas Report." Appendixes summarize data collection operations/report methodology and provide thermal conversion factors/data. A glossary is included. 46 tables, 14 figures.

38 **Natural gas annual 1984. Volume II. (DOE/EIA—0131(84)/2)** (Annual) Dec 1985. 276p. GPO Stock No. 061-003-00469-5, Domestic $9.50/Foreign $11.88

1980-1985.

Information on deliveries of natural gas to large end users by Standard Industrial Classification (SIC) Code for 5 heating years from 1980-1981 through 1984-1985 is presented. These data are derived from Form FERC-50, "Alternative Fuel Demand Due to Natural Gas Deficiencies Report," Schedule III, "Large End-use Data," and the predecessor Form EIA-50, "Alternative Fuel Demand Due to Natural Gas Curtailments." Schedule III is filed by Form FERC-50 respondent companies only for customers netting 100 million cubic feet or more of deliveries and deficiencies per year. Data reflect only sales to ultimate consumers; other natural gas transactions are not included. Deliveries to the top 20 industries; deliveries to large end users by SIC Code; deliveries by the top 100 distributors; deliveries to large end users by industry and State; and deliveries to large end users by distributor and consumer for each State are shown for the 5 heating seasons. An appendix presents a summary of data collection operations and report methodology. A glossary is included. 6 tables, 5 figures.

39 **Gas supplies of interstate natural gas pipeline companies 1984. (DOE/EIA—0167(84))** (Annual) Dec 1985. 152p. GPO Stock No. 061-003-00463-6, Domestic $5.00/Foreign $6.25; NTIS DE86004078

1963-2004.

Information on the total reserves, production, and deliverability capabilities of the 89 interstate natural gas pipeline companies required to file the Federal Energy Regulatory Commission (FERC) Form 15, "Interstate Pipeline's Annual Report of Gas Supply," is presented for 1984. The gas supplies of these companies consist of the natural gas available from domestic in-the-ground reserves; gas purchased under contracts with other interstate pipeline companies; domestically produced coal gas, liquefied natural gas (LNG), and synthetic natural gas; and imported natural gas and LNG. The domestic in-the-ground reserves consist of company-owned reserves including natural gas in underground storage, reserves dedicated to or warranted under contracts with independent producers, and supplemental or short-term supplies purchased from independent producers and intrastate pipeline companies. An overview is first presented, followed by narrative summaries on the distribution of domestic natural gas reserves and production, domestic supplies of the 25 major companies, total gas supplies of the 89 companies, deliverability (through the year 2004), and pipeline imports. A glossary is provided, and five appendixes present additional material. 18 tables, 8 figures.

40 **Statistics of interstate natural gas pipeline companies 1984. (DOE/EIA—0145(84))** (Annual) Oct 1985. 236p. GPO Stock No. 061-003-00459-8, Domestic $8.50/Foreign $10.63; NTIS DE86001920

1975-1984.

Financial and operating information on the 43 major U.S. interstate natural gas pipeline companies is reported for 1984. Data are compiled from Form FERC-2, "Annual Report of Major Natural Gas Companies," and reported separately for each company and for all companies combined. Some of the composite data are summarized for the years 1975-1984. Shown are: balance sheets; statement of income/retained earnings; changes in financial position; gas customers, sales, and operating revenues; gas operation and maintenance expenses; gas utility plant; gas account statistics; and selected physical operating characteristics. Form FERC-2's reporting requirements were changed for 1984. The classification of interstate natural gas pipeline companies was changed to major companies and nonmajor companies. A State index that lists each company and the States in which the company furnished service is included. A list of orders issued by the Federal Energy Regulatory Commission since November 12, 1972, that affect the filing of Form FERC-2 is included. 21 tables.

41 **Domestic uranium mining and milling industry. 1984 viability assessment. (DOE/EIA—0477)** (One-time) Sep 1985. 184p. GPO Stock No. 061-003-00450-4, Domestic $6.50/Foreign $8.12; NTIS DE86001141

1954-2000.

The condition of the domestic uranium mining and milling industry is examined. Information on recent supply, demand, and marketing conditions is presented, and the industry's ability to continue to supply the needs of the nuclear power industry through the year 2000 is assessed. Four major attributes of industry viability are examined: resource capability, supply response capability, financial capability, and import commitment dependency. An overview provides a discussion of the evolution of the domestic uranium industry. An Executive Summary is provided; a glossary is included. Five appendixes describe the criteria to assess viability, foreign uranium demand/resources, and the model/methodology; compare supply disruption projections; and present U.S. uranium industry projections. 31 tables, 32 figures.

42 **Uranium industry annual 1984. (DOE/EIA—0478(84))** (Annual) Oct 1985. 164p. GPO Stock No. 061-003-00457-1, Domestic $6.00/Foreign $7.50; NTIS DE86002041

1948-2000.

Information on the U.S. uranium industry is presented. Uranium raw material activities described include exploration, resources, mine production, milling operations, and employment. Uranium marketing activities discussed include: utility purchases, uranium prices, domestic procurement, foreign purchases, enrichment, inventories, market requirements, and availablility. This information is collected on Form EIA-858, "Uranium Industry Annual Survey." This report contains data previously reported in "Survey of United States Uranium Marketing Activity" (DOE/EIA—0403) and "Survey of U.S. Uranium Exploration Activity" (DOE/EIA—0402). Four appendixes describe the survey methodology, provide technical notes, list repondents to the survey, and present the survey. A glossary is included. 50 tables, 34 figures.

08 MULTIFUEL

REFER ALSO TO CITATION(S) 88, 89, 91, 94, 95

43 **Monthly energy review. (DOE/EIA—0035)** (Monthly) Apr 1985. Issue (85/01), 140p. GPO subscription—Domestic $42.00/Foreign $52.50;Single issue—Domestic $3.75/Foreign $4.69; NTIS DE 85009599

1973-1985.

Current data on U.S. production, consumption, stocks, imports, exports, and prices of principal energy commodities are reported for each month of 1983 through the current month of 1985 and for each year from 1973 through 1984. Quarterly summaries for the current year are also provided. Covered are crude oil, petroleum products, natural gas, coal, nuclear power, and electric utilities. Also reported are energy consumption by sector, selected energy indicators, and oil and gas resources development. An international section provides information on petroleum production, consumption, and stocks and on nuclear electricity generation. A feature article, conversion factors, and glossary are included. 55 tables, 29 figures.

44 **Short-term energy outlook. Quarterly projections. (DOE/EIA—0202)** (Quarterly) Jan 1985. Issue (85/1Q), 56p. GPO subscription—Domestic $17.00/Foreign $21.25;Single issue—Domestic $3.00/Foreign $3.75; NTIS DE 85006739

1980-1986.

The Energy Information Administration's (EIA) quarterly forecasts of energy supply, demand, and prices are presented for each quarter of 1985 and the first 2 quarters of 1986. The forecasts are produced using the Short-Term Integrated Forecasting System (STIFS), which uses two principal driving variables, a macroeconomic forecast and the world oil price assumptions. The three projections for petroleum supply and demand are based on low, middle, and high economic growth scenarios that incorporated high, middle, and low crude oil price trajectories. The tables and discussion in this volume primarily refer to the middle, or base case, scenario and to the domestic situation. Other cases examining the sensitivity of total petroleum demand to varying assumptions about prices, weather, and economic activity are presented. The petroleum outlook includes detailed projections of domestic crude oil production, motor gasoline, distillate fuel oil, residual fuel oil, other products, and inventories. Other projections include natural gas, coal, and electric power. The international petroleum situation is also discussed. 17 tables, 8 figures.

45 **State energy data report. Consumption estimates, 1960-1983. (DOE/EIA—0214(83))** (Annual) May 1985. 728p. GPO Stock No. 061-003-00435-1, Domestic $22.00/Foreign $27.50; NTIS DE85013310

1960-1983.

Estimates of energy consumption by principal energy source, by major end-use sector, and by State are presented for the time period 1960-1983. These data are produced from the State Energy Data System. Consumption data are given in trillion Btu and in standard physical units. In addition to State-level data, aggregations for the nine Census Regions are also provided. Some changes in methodology and improvements were incorporated in this issue. Technical documentation and appendixes are included. An Executive Summary is provided. 456 tables, 227 figures.

46 State energy data report supplement. Consumption estimates, 1960-1983. (DOE/EIA—0214(83)S) (Annual) May 1985. 114p. GPO Stock No. 061-003-00436-9, Domestic $3.75/Foreign $4.69; NTIS DE85013047

1960-1983.

Selected summaries of estimates of energy consumption by principal energy source, by major end-use sector, and by State are presented for the time period 1965-1983. Data on per capita energy consumption are also given. Data on the yearly change in consumption by type and by end-use sector are presented in trillion Btu and as a percentage. Some data are given for the time period 1960-1964. Energy sources are coal, natural gas, petroleum, nuclear, hydroelectric, other, and electricity exchanges. End-use sectors are residential, commercial, industrial, and transportation. These data are produced from the State Energy Data System. Some changes in methodology and improvements were incorporated in this issue. Technical documentation and appendixes are included in the main volume. An Executive summary is provided. 74 tables, 13 figures.

47 International energy annual 1984. (DOE/EIA—0219(84)) (Annual) Oct 1985. 140p. GPO Stock No. 061-003-00455-5, Domestic $4.75/Foreign $5.94; NTIS DE86001829

1974-1985.

Current data and trends for production, consumption, stocks, imports, and exports of primary energy commodities in more than 190 countries, dependencies, and areas of special sovereignty are presented. The time period covered is 1974-1984. Prices for crude oil and petroleum products in selected countries are also included. Primary energy sources are crude oil, natural gas plant liquids, natural gas, coal, hydroelectric power, and nuclear electric power. Data are displayed in both British Thermal Units and in standard physical units. Petroleum supply, disposition, and refining capacity are covered in greater detail. Natural gas and coal supply and disposition are also given. Reserves data for crude oil, natural gas, and coal are provided. A glossary is included. Four appendixes present sources, list countries/areas, provide volume/weight conversions, and provide gross thermal conversions by energy source. 34 tables, 21 figures.

48 State energy overview 1983. (DOE/EIA—0354(83)) (Annual) Aug 1985. 460p. GPO Stock No. 061-003-00449-1, Domestic $16.00/Foreign $20.00; NTIS DE85017299

1972-1984.

An overview of selected energy-related data for the United States, for each State, and for the District of Columbia is presented. Energy produced and consumed, reserves, the value of nonrenewable energy sources produced, energy expenditures, and consumer prices are shown. In addition, for each State, demographic and energy-related data are ranked and expressed as a percentage of the national total. Some data for 1984 are preliminary; all data for 1983 are final. A glossary is included. The methodology to develop estimates is also discussed. 154 tables, 643 figures.

49 State energy price and expenditure report 1970-1982. (DOE/EIA—0376(82)) (Annual) Apr 1985. 584p. GPO Stock No. 061-003-00431-8, Domestic $20.00/Foreign $25.00; NTIS DE85010678

1970-1982.

Estimated energy prices and expenditures are presented for the 50 States, the District of Columbia, and the United States for each year from 1970 through 1982. Estimates are presented by energy source (coal, natural gas, petroleum products, nuclear, wood/waste at electric utilities, and electricity) and by sector (residential, commercial, industrial, transportation, and electric utility). Documentation on the expenditure estimates is provided, including sources of data, methods of estimation, notes on conversion factors, and a section describing changes in methodology since the previous report. An appendix lists cases of regional price imputation. All State estimates are expressed in current dollars, while U.S. estimates are provided in both current and constant dollars. 218 tables, 166 figures.

50 Annual energy outlook 1984. With projections to 1995. (DOE/EIA—0383(84)) (Annual) Jan 1985. 388p. GPO Stock No. 061-003-00419-9, Domestic $10.00/Foreign $12.50; NTIS DE85007089

1973;1978;1983-1995.

Projections of energy supply, consumption, and prices for each year through 1990 and for the year 1995 are presented. Both domestic and international energy markets are examined. This report is the ninth in a series of annual energy forecasts. Separate chapters discuss the base case outlook, international energy markets, energy and the economy, energy consumption, petroleum/natural gas, electric utilities/nuclear power, coal, and forecast comparisons. The discussion of the base case outlook examines the sensitivity of the forecast to different assumed levels of economic growth; the fuel chapters examine specific sensitivity cases, discuss important issues, and provide background information. The chapter on forecast comparisons presents other published forecasts, as well as the previous year's forecast. This report uses the results for 1984 and 1985 published in the October 1984 "Short-Term Energy Outlook" (DOE/EIA—0202). Documentation and data sources are provided. Seven appendixes present detailed results of the different scenarios, discuss the forecasting assumptions, and describe the sensitivity cases. An Executive Summary, glossary, and conversion factors are provided. 155 tables, 34 figures.

51 Annual energy review 1984. (DOE/EIA—0384(84)) (Annual) Apr 1985. 288p. GPO Stock No. 061-003-00430-0, Domestic $10.00/Foreign $12.50; NTIS DE85010696

1949-1984.

Statistical data on U.S. energy supply, production, disposition, and consumption are given for each year from 1949 through 1984. Ten sections cover energy overview; energy indicators; energy resources, exploration, development, and reserves; petroleum; natural gas; coal; electricity; nuclear energy; wood, solar, and geothermal; and international energy. A narrative discussion introduces each section. A glossary, explanatory notes, and documentation are also included. 105 tables, 110 figures.

52 Energy conservation indicators 1984 annual report. (DOE/EIA—0441(84)) (Annual) Dec 1985. 112p. GPO Stock No. 061-003-00466-1, Domestic $4.00/Foreign $5.00

1958-1984.

Trends in U.S. energy use in relation to economic, demographic, and other factors that affect the level of energy consumption are examined. Conservation indicators for the year 1984 are presented for the aggregate economy and for four end-use sectors: residential, commercial, transportation, and industrial. Narrative sections discuss trends for each sector. Data are displayed on graphs by year or region, as appropriate. An appendix provides the data tables, data sources, and documentation for each indicator. 46 tables, 46 figures.

53 Energy facts 1984. (DOE/EIA—0469) (Annual) May 1985. 62p. GPO Stock No. 061-003-00453-9, Domestic $1.50/Foreign $1.88; NTIS DE85011950

1973-1984.

A broad range of domestic and international energy data are provided in booklet form. The time period covered is 1973-1984. This report is designed for quick reference to major facts about energy. Separate chapters present an overview for each energy source (petroleum, natural gas, coal, electric power, and nuclear power). A glossary is included. Source publications are listed. 30 tables, 38 figures.

54 United States energy balance. Procedures for International Energy Agency submission. (DOE/EIA—0480) (One-time) Oct 1985. 196p. GPO Stock No. 061-003-00458-0, Domestic $7.00/Foreign $8.75; NTIS DE86001922

1985.

The process of constructing the energy balance of the United States, which is submitted on an annual questionnaire circulated by the International Energy Agency (IEA), is described. The U.S. energy balance is published on a comparable basis along with those of the other members of the Organization for Economic Cooperation and Development (OECD). Calculating the balance is discussed in detail for each fuel. A bibliography is included. Four appendixes provide the IEA questionnaire, the OECD annual fuel questionnaires, a guide for the calculation of the energy balance, and conversion factors. The Energy Information Administration also completes a set of fuel-specific annual forms for the IEA. The intended audience for this report includes users of OECD publications who wish to have a complete understanding of how the U.S. data are derived. 4 figures.

14 SOLAR ENERGY

1410 SOLAR COLLECTORS AND CONCENTRATORS

55 Solar collector manufacturing activity 1984. (DOE/EIA—0174(84)) (Annual) Aug 1985. 76p. GPO Stock No. 061-003-00443-1, Domestic $2.75/Foreign $3.44; NTIS DE85016470

1974-1984.

Producer shipments and end-use data from manufacturers of solar thermal collectors and photovoltaic modules are presented for each year from 1982 through 1984. Data for solar thermal collectors are shown by company headquarters location, collector type, end use, and market sector. Also reported are imports, exports, related activities, and prototype development. Photovoltaic module data shown are market sector, end use, and exports. Additional information is given for the time period 1974-1981. Because of changes in the survey, data for total solar thermal collector shipments from the 1984 survey are not directly comparable with the data from earlier surveys. Appendixes provide Form EIA-63, describe its history and methodology, and list manufacturers responding to the survey. A glossary of terms is included. 16 tables, 3 figures.

20 ELECTRIC POWER

2001 POWER PLANTS AND POWER GENERATION

REFER ALSO TO CITATION(S) 30, 49, 72, 96, 97, 98, 101

56 Trends in electric utility load duration curves. (DOE/EI/19635-1) (One-time) May 1985. 162p. NTIS DE85011451, $16.95

1973-1982.

The development and analysis of annual and quarterly electric utility load duration curves for each of the 10 Federal Regions are documented. Analyses to test for changes in load duration curves over time are described. A brief overview is provided. Separate chapters discuss the data base; describe the representation of loads and the development of seasonal load duration curves for each Federal Region; discuss alternative approaches for estimating load duration curves; analyze trends in load curves; and present a summary of key findings and conclusions. Specific recommendations for the integration of the results of this analysis into the Intermediate Future Forecasting System are also made. The basic data used for this analysis are aggregates of hourly load measures collected from electric utilities by the Edison Electric Institute. These data include hourly loads for every hour in each of 9 years, 1973 and 1975 through 1982. Six appendixes provide additional material. 13 tables, 7 figures.

57 Inventory of power plants in the United States 1984. (DOE/E[illegible]—0095(84)) (Annual) Jul 1985. 100p. GPO Stock No. 061-003-00442-3, Domestic $3.50/Foreign $4.38; NTIS DE85015557

1984-1994.

Information on electric generating units operated by or planned by electric utilities in each of the 50 States and the District of Columbia is provided for the year 1984. The report is divided into four sections: summary, which contains statistics for 1984 at the national, regional, and State levels for existing, retired, and planned electric generating units by primary energy source; electric generating units, which provides detailed data for each unit that was placed in commercial operation or retired in 1984; projected units, which reports detailed information on each unit scheduled to start commercial operation between 1985 and 1994; and jointly owned units, which presents ownership data. Detailed data include name of electric utility, location of utility, energy sources used, and installed nameplate capacity. These data were compiled primarily from Form EIA-860, "Annual Electric Generator Report," and supplemented with monthly updates from Form EIA-759, "Monthly Power Plant Report." Beginning with the reporting year, a comprehensive version of this report will be published every fifth year. A glossary and technical notes are included. 18 tables, 10 figures.

58 Electric power monthly. (DOE/EIA—0226) (Monthly) Jun 1980-1985. Issue (85/01), 60p. GPO subscription—Domestic $32.00/Foreign $40.00;Single issue—Domestic $3.00/Foreign $3.75; NTIS DE 85010007

1974-1984.

U.S. electric power data are reported for the current month of 1985, the previous month, the corresponding month of 1984, and the year-to-date for 1984 and 1985. Summary data are given for each year from 1975 to the present. Shown are: net generation by region and energy source; consumption of fossil fuels to produce electric power; coal and petroleum product stocks; receipts and average cost of fuels for steam-electric plants of 50-megawatt capacity or larger; sales of electric power by class of service; and retail prices of electric power in 40 selected cities. A glossary is provided. 26 tables.

59 Typical electric bills. January 1, 1985. (DOE/EIA—0040(85)) (Annual) Dec 1985. 260p. GPO Stock No. 061-003-00467-9, Domestic $9.00/Foreign $11.25

1935-1985.

Comprehensive coverage of the 1984 cost to consumers for representative amounts of electricity used per month for the residential, commercial, and industrial sectors is presented. Bills for residential electric service are reported for five different energy consumption levels in all communities with populations of 2,500 or larger. Commercial and industrial bills are presented for larger cities. Commercial bills are shown for six combinations of billing demands and monthly consumption levels; industrial bills cover five billing demands and ten consumption levels. Narrative text discusses each sector. Summary data are given for the 10 highest and lowest bills for representative consumption levels for publicly and privately owned utilities serving communities of 50,000 in population or larger. National weighted average bills for residential service are presented for each year from 1935 through 1984. These data are collected on Form EIA-213, "Typical Net Monthly Bills." An appendix gives weighted bills for rural cooperatives and for publicly and privately owned utilities. Technical notes are provided. 39 tables, 7 figures.

60 Financial statistics of selected electric utilities 1983. (DOE/EIA—0437(83)) (Annual) Feb 1985. 992p. GPO Stock No. 061-003-00424-5, Domestic $20.00/Foreign $25.00; NTIS DE85007648

1972-1983.

Financial data for both privately and publicly owned electric utilities are reported for the year 1983, with summary data given for each year from 1974 through 1983. Data in this report include balance sheets; income/retained earning statements; statements of changes in financial position; electric operating revenues, sales, and customers by classes of service; electric operation/maintenance expenses; utility plant; physical quantities; rates of return on electric utility rate base; rates of return on common equity; interest coverage/capitalization ratios; advertising/sale expenses; environmental protection facilities; and actual expenses incurred. Data for privately owned utilities are given for all utilities combined and for each individual utility, while data for publicly owned utilities are given only for all combined. Data for the 199 private utilities were collected on Form FERC-1, "Annual Report of Major Electric Utilities, Licensees, and Others"; data for the selected 162 public utilities were collected on Form EIA-412, "Annual Report of Public Electric Utilities." Before the 1982 report, this information was found in two publications: "Statistics of Privately Owned Electric Utilities" (DOE/EIA—0044) and "Statistics of Publicly Owned Electric Utilities" (DOE/EIA—0172). 54 tables, 6 figures.

61 Historical plant cost and annual production expenses for selected electric plants 1983. (DOE/EIA—0455(83)) (Annual) Apr 1985. 272p. GPO Stock No. 061-003-00428-8, Domestic $7.50/Foreign $9.38; NTIS DE85010006

1938;1948;1956-1983.

Information on the historical plant cost and annual power production expenses for selected hydroelectric, fossil-fueled steam-electric, gas turbine, and nuclear steam-electric plants is provided for the year 1983. Some summary data are presented for each year from 1974 through 1983. Historical plant cost is the initial investment in plant (cumulative to the date of initial commercial operation) plus the costs of all additions to the plant, less the value of retirements. Thus, historical plant cost includes expenditures made over several years, as modifications are made to the plant. Power production expenses include operation, maintenance, and fuels. Data on installed generating capacity, net generation, net capability, fuel consumption, and physical plant characteristics are also shown. Data and narrative discussions on each type of plant are presented in separate chapters. Plant-level data are arranged by State, utility, and plant. These plants were selected mainly on the basis of their net generation. A glossary, appendices, and technical notes are included. 18 tables, 5 figures.

62 Analysis of the projected electricity prices to 1995. (DOE/EIA—0470) (One-time) Aug 1985. 84p. GPO Stock No. 061-003-00446-6, Domestic $3.00/Foreign $3.75; NTIS DE85016545

1949-1995.

The electric power price projections from the "Annual Energy Outlook 1984" (AEO) (DOE/EIA—0383(84)) are examined. This report provides additional analysis of electric power projections for each year through 1995, examines the factors that influence future prices, and presents a range of electric power price forecasts under different assumptions. This examination of future trends in prices through 1995 involves a discussion of both the AEO forecast and a set of sensitivity cases that explore changes in prices resulting from alternative assumptions of fuel prices, capital costs, and electric power demand growth. Two appendixes discuss accounting and pricing in the Electric Market Module of the Intermediate Future Forecasting System and display the AEO 1984 capital cost assumptions. 25 tables, 6 figures.

63 Annual outlook for U.S. electric power 1985. (DOE/EIA—0474(85)) (Annual) Aug 1985. 96p. GPO Stock No. 061-003-00445-8, Domestic $3.25/Foreign $4.06; NTIS DE85016937

1902-1995.

Historical data on and projections of the U.S. electric utility market are presented. Summary information on the generation of electric power, its distribution to end-use sectors, and on electric power costs and prices is also provided. Separate chapters present a general overview on the history of the electric utility industry, describe the ownership structure of the industry, present an operational overview of electric utility systems, project the outlook for electric power for the time period 1985-1995, and discuss the factors affecting the outlook for electric power. Three appendixes outline basic generating technologies, display historical statistics, and present projections for the middle economic growth case for the 10 Federal Regions. 8 tables, 9 figures.

64 Analysis of growth in electricity demand, 1980-1984. (DOE/EIA—0476) (One-time) Sep 1985. 60p. GPO Stock No. 061-003-00451-2, Domestic $2.25/Foreign $2.81; NTIS DE85018010

1953-1984.

Recent trends for the time period 1980-1984 in the demand for electricity are examined. Historical trends for the time period 1953-1980 in electricity demand are first reviewed, followed by a discussion of regional and sectoral trends. The effects of weather on electricity demand are also described. Recent changes in the use of electricity in the industrial sector are examined in detail. Time periods analyzed are 1953-1973, 1973-1980, and 1980-1984. An appendix presents the regression analysis results. 18 tables, 21 figures.

65 Determinants of capital costs for coal-fired power plants. (DOE/EIA—0479) (One-time) Oct 1985. 132p. GPO Stock No. 061-003-00460-1, Domestic $4.75/Foreign $5.94; NTIS DE86001921

1981-1990.

Electric utility practices related to the estimation and realization of capital investment costs for new coal-fired generating units are described. The factors that affect capital investment costs are determined from four case studies. Information on utility accounting procedures, unit design cost, construction cost, and capital cost estimating techniques is presented. Appendixes profile all coal-fired generating units that have, or are planned to, come on line in the United States from 1981-1990 and examine in detail four units that either entered service after 1981 or are currently planned to enter service by the end of 1985. 11 tables, 10 figures.

66 Fuel choice in steam electric generation: statistical analysis. (DOE/EIA—M012) (One-time) Oct 1985. 246p. NTIS DE86000873, $22.95

1985.

A statistical analysis of fuel choice by electric utilities in the short term is presented. Short-term options for fuel choice include the selection of fuel for multi-fuel boilers, the mix of different generators, and the purchase of power. Fuel choice is examined for each of 12 regions, which are based on the regional reliability councils of the North American Electric Reliability Council. The influence of fossil fuel costs, environmental/fuel use legislation, and supply disruptions on fuel use is discussed. An overview of the methodology is provided. A detailed analysis for each of the 12 regions is presented. A summary is given. A companion report, "Fuel Choice in Steam Electric Generation: Historical Overview" (DOE/EIA—0472), covers regional monthly data. Data sources, technical notes, and a bibliography are provided. 78 tables, 25 figures.

67 Cost and quality of fuels for electric utility plants 1984. (DOE/EIA—0191(84)) (Annual) Jul 1985. 240p. GPO Stock No. 061-003-00441-5, Domestic $8.50/Foreign $10.63; NTIS DE85015203

1980-1986.

Information on the cost and quality of fossil fuel receipts in 1984 to electric utilities is presented, with some data provided for each year from 1980 through 1983. Fuels are coal, fuel oil, and natural gas. Data are reported by company and plant, by type of plant, and by State and Census Region, with U.S. totals. This report contains information on fossil fuel receipts to electric utility plants with a combined steam installed nameplate capacity of 50 megawatts or larger. These data were collected by FERC Form 423, "Monthly Report of Cost and Quality of Fuels for Electric Plants." A glossary of terms and technical notes are included. This is the 11th annual report in a continuing series. 62 tables, 7 figures.

68 Electric power annual 1984. (DOE/EIA—0348(84)) (Annual) Sep 1985. 184p. GPO Stock No. 061-003-00448-2, Domestic $6.50/Foreign $8.13; NTIS DE85017935

1980-1984.

Electric power production and consumption data for 1984 are presented at national, regional, and State levels. Covered in narrative text and extensive tabulations are installed nameplate capacity, net generation, fuel consumption for generation of electricity, fuel receipts, fuel stocks, fuel costs, retail prices of electricity, and electricity sales. Annual aggregations for the time period 1980-1983 are also included. Some petroleum data are subdivided for light and heavy oil. Data on cost and quality of fuel receipts are provided by type of purchase (contract or spot market for coal and petroleum, firm or interruptible for natural gas). Retail prices are presented for 40 selected cities. Highlights with summary tabulations, a glossary, technical notes, and references are included. 59 tables, 21 figures.

69 Electric power quarterly. (DOE/EIA—0397) (Quarterly) Aug 1985. Issue (85/1Q), 348p. GPO subscription—Domestic $22.00/Foreign $27.50;Single issue—Domestic $6.00/Foreign $7.50; NTIS DE 85017328

1984-1985.

Electric power plant-level information about the cost, quantity, and quality of fossil fuel receipts, net generation, fuel consumption, and fuel stocks is provided for the most recent 3 months of 1985. Summary statistics are presented for each State and Census Division, with U.S. totals. Additional data are presented for the past 12 months. Fuel receipts data are shown by type of fuel, type of purchase, and sulfur content, as appropriate. These data are compiled by Form EIA-759, "Monthly Power Plant Report," and FERC Form 423, "Monthly Report of Cost and Quality of Fuels for Electric Plants." A feature article, summary, glossary, technical notes, and references are included. 14 tables.

70 Fuel choice in steam electric generation: historical overview. (DOE/EIA—0472) (One-time) Aug 1985. 180p. GPO Stock No. 061-003-00447-4, Domestic $6.50/Foreign $8.13; NTIS DE85016902

1951-1984.

Data on fuel use by electric utilities in the short term are presented. Short-term options for fuel choice include the selection of fuel for multifuel boilers, the mix of different generators that utilities use at a given time, and the purchase of power. This report focuses primarily on fossil fuel choice. Monthly utility fuel use is reviewed for each of 12 Regions. Fossil-fuel costs, environmental/fuel use legislation, and supply disruptions on fuel use are also discussed. Three appendixes discuss legislation, examine constraints on fuel choice, and present detailed data by Region. 6 tables, 28 figures.

21 NUCLEAR POWER PLANTS

REFER ALSO TO CITATION(S) 74, 75, 76, 77, 78, 84

71 Commercial nuclear power: prospects for the United States and the world. (DOE/EIA—0438(85)) (Annual) Sep 1985. 164p. GPO Stock No. 061-003-00452-1, Domestic $6.00/Foreign $7.50; NTIS DE85004323

1953-2000.

The current status and outlook for commercial nuclear power reactors for all countries in the world outside centrally planned economic areas (WOCA) are described. Documentation of the U.S. nuclear capacity and generation projections through 1995 that are presented in the "Annual Energy Outlook 1984" (DOE/EIA—0383(84)) is provided. In addition, U.S. nuclear capacity and generation projections through 2020 are presented for various nuclear power supply scenarios. The projections for foreign nuclear capacity through 1990 supplant the preliminary foreign WOCA projections presented in the "Outlook" and are supplemented by WOCA country-specific projections through the year 2000. An Executive Summary is provided. Issues and uncertainties affecting nuclear power are discussed. WOCA nuclear programs are reviewed. Nine appendixes present additional material, including listings of both U.S. and foreign nuclear power plants that are operable and in the construction pipeline. Information regarding operable reactors in countries with centrally planned economies is also presented. A glossary is included. 23 tables, 6 figures.

72 Nuclear power plant construction activity 1984. (DOE/EIA—0473(84)) (Annual) Jul 1985. 96p. GPO Stock No. 061-003-00440-7, Domestic $3.50/Foreign $4.38; NTIS DE85015101

1971-1992.

Cost estimates, chronological data on construction progress, and the physical characteristics of nuclear units in commercial operation and units in the construction pipeline as of December 31, 1984, are presented. Data on nuclear units cancelled during 1984 are also included. These data were collected on Form EIA-254, "Semiannual Report on Status of Reactor Construction." Although this report updates a previous report, "Survey of Nuclear Power Plant Construction Costs 1984" (DOE/EIA—0439(84)), the title has been revised to reflect changes in the survey form. Detailed reactor-specific data are presented for nuclear power plants in commercial operation, plants completed but not in commercial operation, plants in the construction pipeline, and plants cancelled. Three appendixes provide information on Form EIA-254, discuss the methodology of the survey, and describe the reactor licensing process. 7 tables, 10 figures.

2108 ECONOMICS

REFER ALSO TO CITATION(S) 71, 72

73 World nuclear fuel cycle requirements 1985. (DOE/EIA—0436(85)) (Annual) Dec 1985. 120p. GPO Stock No. 061-003-00464-4, Domestic $4.25/Foreign $5.31

1950-2020.

Projections of uranium requirements (both yellowcake and enrichment services) and spent fuel discharges are presented, corresponding to the nuclear power plant capacity projections in "Commercial Nuclear Power: Prospects for the United States and the World" (DOE/EIA—0438(85)) and the "Annual Energy Outlook 1984" (DOE/EIA—0383(84)). Domestic projections are provided through the year 2020, with foreign projections through 2000. The domestic and foreign projections through 1995 are consistent with the integrated energy forecasts in the "Annual Energy Outlook 1984." Projections of capacity beyond 1995 are not part of an integrated energy forecast; the methodology for their development is explained in "Commercial Nuclear Power." A range of estimates is provided in order to capture the uncertainty inherent in such projections. The methodology and assumptions are also stated. A glossary is provided. Four appendixes present additional material. 20 tables, 14 figures.

29 ENERGY PLANNING AND POLICY

REFER ALSO TO CITATION(S) 24, 25, 31

2901 ENERGY ANALYSIS AND MODELING

REFER ALSO TO CITATION(S) 7, 20, 50

74 Model documentation of the World Integrated Nuclear Evaluation System. Volume 1: model overview. (DOE/EI/19656-1/1) (One-time) Jul 1985. 18p. NTIS DE85015342, $9.95

1985.

The World Integrated Nuclear Evaluation System (WINES) is described and documented. WINES projects long-term worldwide nuclear power capacity and generation through the year 2050. There are no feedback mechanisms in the model; estimates of electrical and nuclear generation are derived directly from estimates of energy demand. The structure of WINES is discussed. A description and sample of WINES reports are presented. The model's current and potential applications are also described. An appendix contains detailed source citations. Companion reports present the model description, data documentation, and model abstract. 1 table, 2 figures.

75 Model documentation of the World Integrated Nuclear Evaluation System. Volume 2: model description. (DOE/EI/19656-1/2) (One-time) Jul 1985. 43p. NTIS DE85015343, $9.95

1985.

The mathematical specification and parameter estimation for the World Integrated Nuclear Evaluation System (WINES) are presented. WINES projects long-term worldwide installed nuclear generating capacity through the year 2050. Separate chapters cover specifications for economic growth, delivered energy demand, electrical generation, and nuclear generation/installed capacity. An appendix presents WINES commented software. Companion reports present the model overview, data documentation, and model abstract.

76 Model documentation of the World Integrated Nuclear Evaluation System. Volume 3 part A: WINES data documentation. (DOE/EI/19656-1/3A) (One-time) Jul 1985. 121p. NTIS DE85015344, $16.95

1985.

The data documentation of the World Integrated Nuclear Evaluation System (WINES) is presented. WINES projects long-term worldwide nuclear power capacity and generation through the year 2050. The data documentation is provided in two volumes. This volume contains the labor-age population data base. A complete listing of the data sources utilized by the WINES model is included. Companion reports present the model overview, model description, and model abstract. 3 tables.

77 Model documentation of the World Integrated Nuclear Evaluation System. Volume 3 part B: WINES data documentation. (DOE/EI/19656-1/3B) (One-time) Jul 1985. 132p. NTIS DE85015345, $16.95

1985.

The data documentation of the World Integrated Nuclear Evaluation System (WINES) is presented. WINES projects long-term worldwide nuclear power capacity and generation through the year 2050. The data documentation is presented in two volumes. This volume contains the parameter values and the energy/economic data base. Companion reports present the model overview, model description, and model abstract. 3 tables.

78 Model documentation of the World Integrated Nuclear Evaluation System. Volume 4: model abstract. (DOE/EI/19656-1/4) (One-time) Jul 1985. 20p. NTIS DE85015346, $9.95

1985.

The model abstract of the World Integrated Nuclear Evaluation System (WINES) is presented. WINES projects long-term worldwide nuclear power capacity and generation through the year 2050. There are no feedback mechanisms in the model; estimates of electrical and nuclear generation are derived directly from estimates of energy demand. This model abstract describes WINES and its applications, the structural specifications, and samples of output reports. A technical appendix is included. Companion reports present the model overview, model description, and data documentation. 2 tables, 1 figure.

79 Oil Market Simulation model. Model documentation report. (DOE/EI/19656-2) (One-time) May 1985. 152p. NTIS DE85016246, $16.95

1985.

The Oil Market Simulation (OMS) model is documented. The OMS model forecasts future world oil prices, regional oil supply, and regional oil demand. Non-Communist countries are grouped into seven major oil demand regions and eight major oil supply regions. Separate chapters provide the model overview with mathematical specifications; the variable, data, and parameter listing; the documentation of model estimates; a description of the solution method; and a description of model applications. Appendixes summarize OMS model information, present a user's guide/software description, and provide additional information. 10 tables, 7 figures.

80 International Nuclear Model. Volume I: overview. (DOE/EI/19656-3/1) (One-time) Mar 1985. 46p. NTIS DE86017214, $9.95

1985.

The International Nuclear Model (INM) is described. INM is a comprehensive model of the commercial nuclear power industry. INM simulates reactor deployment schedules, electricity generation, and fuel cycle costs/requirements. Unique capabilities of the model are discussed. The mathematical specifications are presented. Data requirements and output reports are also described. An appendix presents the model summary. Companion reports present the data base relationships and the program description. 13 tables.

81 International Nuclear Model. Volume II: data base relationships. (DOE/EI/19656-3/2) (One-time) Apr 1985. 234p. NTIS DE85017215, $28.95

1985.

The data base of the International Nuclear Model (INM) is documented. INM is a comprehensive model of the commercial nuclear power industry. INM simulates reactor deployment schedules, electricity generation, and fuel cycle costs/requirements. Data categories cover scenario control, fuel management, capacity factors, reactor/fuel cycle facility costs/capacities, inventories, operating facilities, regulations, and costs. Two appendixes list the complete INM data dictionary and those elements of the data dictionary that have been implemented. References are included. Companion reports present a model overview and the program description. 22 figures.

82 International Nuclear Model. Volume III: program description part A. (DOE/EI/19656-3/3A) (One-time) Jun 1985. 500p. NTIS DE85017217, $52.95

1985.

The program description of the International Nuclear Model (INM) is documented. INM is a comprehensive model of the commercial nuclear power industry. INM simulates reactor deployment schedules, electricity generation, and fuel cycle costs/requirements. The INM program logic and mathematical equations are described. This report serves as a user's guide for input specifications and report formats. This volume displays Appendixes A-H. Companion reports present a model overview and the data base relationships.

83 International Nuclear Model. Volume III: program description part B. (DOE/EI/19656-3/3B) (One-time) Jun 1985. 500p. NTIS DE860000721, $16.95

1985.

The program description of the International Nuclear Model (INM) is documented. INM is a comprehensive model of the commercial nuclear power industry. INM simulates reactor deployment schedules, electricity generation, and fuel cycle costs/requirements. The INM program logic and mathematical equations are described. This report serves as a user's guide for input specifications and report formats. This volume displays Appendixes I-O. Companion reports present a model overview and the data base relationships.

84 Short-Term Nuclear Annual Power Production Simulation documentation (SNAPPS). (DOE/EI/19656-4) (One-time) Sep 1985. 310p. NTIS DE86003474, $22.95

1985.

The Short-Term Nuclear Annual Power Production Simulation System (SNAPPS) is documented. SNAPPS projects short-term monthly and annual electricity generation for U.S. commercial nuclear reactors by region, State, or reactor. SNAPPS also produces aggregate monthly and annual capacity factor projections. A model overview is first presented, followed by separate chapters on capacity factors, data requirements, output reports, program description, and the nuclear waste fee program. Extensive additional information is also provided in eight appendixes. 2 tables, 28 figures.

85 Model documentation of the World Oil Supply model. (DOE/EI/19656-5) (One-time) May 1985. 100p. NTIS DE86003957, $11.95

1985.

The World Oil Supply (WOS) model is described and documented. The WOS model is the principal model used by the Energy Information Administration to support the international (non-United States) oil supply analysis presented in the "Annual Energy Outlook" (DOE/EIA-0383(84)). The WOS model is used to project oil supplies in the non-Communist world over the longer term. The WOS model also projects proved reserves, discovery ratios, reserves-to-production ratios, and production. The model structure, mathematical specifications, and model estimates are described. Process and data flow diagrams are displayed. Variables, data, and parameters, as well as data sources, are discussed. Four appendixes present additional information. 2 tables, 5 figures.

86 Model documentation for the Mini-Macroeconomic Model: MINMAC. (DOE/EIA—M002) (One-time) Jan 1985. 48p. NTIS DE85006325, $9.95

1985.

The Mini-Macroeconomic Model (MINMAC), the macroeconomic component of the Energy Information Administration's Intermediate Future Forecasting System (IFFS), is documented. MINMAC provides forecasts of deviations from a given base case for eight macroeconomic variables utilized by IFFS. MINMAC is an econometric approximation of a large-scale macroeconomic model, the Annual Scenario Model developed by Data Resources, Inc., and was developed to simplify the computational process. A submodel, the Industrial Output module, disaggregates projections to the two-digit Standard Industrial Classification level. A model overview is first presented, followed by a listing of variables, mathematical specification, and documentation of model estimates. Two appendixes present the model summary and provide the computer code. 4 tables, 1 figure.

87 Model documentation for the Oil Market Module of the Intermediate Future Forecasting System. (DOE/EIA—M003) (One-time) Jan 1985. 94p. NTIS DE85007056, $11.95

1985.

The Oil Market Module (OMM) of the Energy Information Administration's Intermediate Future Forecasting System (IFFS) is documented. OMM represents domestic oil refining and petroleum product pricing and distribution. In particular, OMM projects the delivered prices of petroleum products under different assumptions for refinery operating capacities and characteristics. Product prices in response to the consumption projections of the IFFS demand modules are the major output of OMM. A model overview is first presented, followed by narrative sections on methodology, data sources, and software. A companion document, "Intermediate Future Forecasting System: Executive Summary" (DOE/EIA—0430), presents an overview of the components of IFFS and their linkages. Appendixes provide the model summary and additional information. 5 tables, 3 figures.

88 Documentation of the Integrating Module of the Intermediate Future Forecasting System. (DOE/EIA—M005) (One-time) Mar 1985. 136p. NTIS DE85010938, $16.95

1985.

The central Integrating Module (MAIN) in the Energy Information Administration's Intermediate Future Forecasting System (IFFS) is described and documented. IFFS consists of four supply modules, a stocks module, a macroeconomic module, five demand modules, and the central integrating module. A general description of IFFS is first presented, with an emphasis on the role of the MAIN module in the total system. The functions of the integrating framework are examined, and a detailed description of it is provided. In addition, three supporting programs for IFFS, the database, the run submission, and the reporting systems are addressed. Two appendixes provide additional information. 5 figures.

89 Documentation of the Demand Analysis System database. (DOE/EIA—M006) (One-time) Apr 1985. 42p. NTIS DE85011523, $9.95

1970-1983.

The Demand Analysis System (DAS) database of the Energy Information Administration's Intermediate Future Forecasting System (IFFS) is documented. The DAS database provides the fuel definitions and consumption and price categories that are used for the demand side representation of IFFS. The primary database sources are the State Energy Data System and the State Energy Price and Expenditure System. The DAS database is updated annually. An overview describes the DAS database. Narrative sections discuss the sources and manipulations of the DAS database, examine areas of future improvement of the database, display the national-level consumption and prices for the time period 1970-1983, and describe the programming system that produces the database. An appendix describes data references. 13 tables.

90 Methodology description for the Well Completion Estimation Model. (DOE/EIA—M007) (One-time) May 1985. 164p. NTIS DE85012335, $16.95

1970-1984.

The methodology for revising drilling data published by the Energy Information Administration is documented. Historical data through 1984, as well as newly available information for 1985, will reflect the modifications introduced by the new system. The new data system has been developed to adjust drilling data for distortions caused by a known reporting lag affecting the data. The traditional system of presentation provides data by reporting period. The new series published will provide drilling data by completion period. The nature of drilling statistics is first investigated. The reporting lag problem is discussed. A new model, the Well Completion Estimation Model, that is based on the methodology for reducing known biases in the data, is described. A companion volume will present the software description. Nine appendixes provide additional information. 13 tables, 8 figures.

91 Model documentation report: Short-Term Integrated Forecasting System Demand Model 1985. (DOE/EIA—M009) (One-time) Jul 1985. 84p. NTIS DE85015341, $11.95

1985.

The demand models of the Energy Information Administration's Short-Term Integrated Forecasting System (STIFS) are documented. STIFS is used to produce the energy demand forecasts published in the "Short-Term Energy Outlook" (DOE/EIA—0202). A model overview is first presented. A general description of the modeling procedure is given. Variables, estimated coefficients, and mathematical specifications for each of the fuel submodels are examined. Model estimates used to generate the forecasts published in the April 1985 "Outlook" are documented. Appendixes present the model abstract and provide additional information. 53 tables, 2 figures.

92 Coal Supply and Transportation Model: user manual. (DOE/EIA—M010) (One-time) Jul 1985. 68p. NTIS DE85015340, $11.95

1985.

A guide for users of the programs in the Energy Information Administration's Coal Supply and Transportation Model (CSTM) system is presented. CSTM functions as either a component of the Intermediate Future Forecasting System or as a stand-alone forecasting model. An overview of the CSTM system is presented. CSTM input files and preprocessing programs/input data are described. Procedures for modifying/updating files and for running the programs are discussed. This manual is limited to system design and processing functions; it provides information on the technical design or capabilities of CSTM. Two appendixes provide an annotated listing of the basic CSTM input data and sample output reports. 15 figures.

93 Refinery Evaluation Modeling System (REMS) database documentation (1985 update). (DOE/EIA—M011) (One-time) Aug 1985. 292p. NTIS DE86001261, $22.95

1985.

The 1985 database of the Refinery Evaluation Modeling System (REMS) is documented. REMS simulates the operation of U.S. refineries, including the purchase and transportation of crude oil and raw materials to refineries, the processing of these raw materials into petroleum products, and the distribution of petroleum products to meet regional demand. REMS consists of two components, regional Refinery Yield Models (RYM) and the Oil Refining and Distribution Model (ORAD). A model overview of the structure of REMS is presented. Geographic disaggregation and the 1984 U.S. petroleum balance are described. Separate chapters discuss RYM and ORAD model data sources and display model data input tables. A companion report that presents an operation and installation manual for REMS and the 1985 database is scheduled for later release. 117 tables, 12 figures.

94 Short-term energy outlook. Methodology. (DOE/EIA—0202/2) (Annual) Jul 1985. Issue (85/3Q), 100p. GPO Stock No. 061-003-80008-4, Domestic $5.50/Foreign $6.88; NTIS DE86001828

1953-1986.

The methodological background used to develop the projections of the quarterly "Short-Term Energy Outlook" is presented. These forecasts are produced using the Short-Term Integrated Forecasting System (STIFS). This supplemental documentation report is published periodically to discuss major changes in the forecasting methodology, to analyze previous forecast errors, and to examine current issues that affect the Energy Information Administration's short-term energy forecasts. Detailed discussions of the models and forecasting methodologies have been presented in previous editions of this methodological volume. Six independent chapters describe recent changes in the methodology; present a forecast evaluation; provide historical model simulations for the years 1984-1985; compare energy forecasts for the year 1985; examine electricity demand for the time period 1953-1985; and present an improved integrating procedure for STIFS. An appendix provides electricity demand analysis data. 54 tables, 3 figures.

95 Demand Analysis System elasticities. (DOE/EIA—0475) (One-time) Jun 1985. 82p. NEIC

1985.

The behavior of the Demand Analysis System (DAS) with respect to changes in energy prices and income is summarized. The DAS provides energy consumption projections for the residential, commercial, industrial, and transportation sectors to the year 1995. DAS is a component of the Intermediate Future Forecasting System (IFFS). This report describes characteristics of the version of DAS that was used to prepare the 1984 "Annual Energy Outlook" (DOE/EIA—0383(84)). A brief overview of DAS is first presented, followed by a discussion of the aggregate end-use energy demand elasticities. These elasticities are estimated across all end-use sectors and provide price and income elasticities by fuel. The representation of the responsiveness of energy consumption components to changes in prices and income is described for each fuel and sector. This report is not a documentation of DAS but rather provides an overview of the mechanics of how the energy demand forecasts were developed. Two appendixes discuss the methodology used to calculate elasticities and describe the methodology employed for each sector. 34 tables, 16 figures.

96 Revenue Requirements Model (RRM) documentation. (DOE/NBB—0069) (One-time) Feb 1985. 44p. NTIS DE85011091, $9.95

1985.

The methodology and use of the Revenue Requirements Model (RRM) are documented. RRM estimates the impact of various regulatory and economic policy variables on the total revenue requirements of electric utilities. RRM will directly interface with the Financial Information Analysis System (FIAS), which is currently under development. An overview of RRM is first presented. The RRM solution method is described. The operation of RRM is discussed, including model execution, FIAS interface, and sample reports. A brief description of the software is also provided. A technical appendix presents a formal description of RRM and lists model variables. 7 tables, 4 figures.

97 Documentation of the National Utiltity Financial Statement (NUFS) model. Volume I: methodology description and user's guide. (DOE/NBB—0072/1) (One-time) Jun 1985. 91p. NTIS DE85013089, $11.95

1984.

The methodology and use of the National Utility Financial Statement (NUFS) model are described and documented. NUFS is a financial model that projects on an annual basis financial variables for the electric utility industry. The data inputs and format of each input file are described. The output reports and running procedures are also discussed. Two appendixes provide the model abstract and a variable list. 13 tables, 3 figures.

98 Documentation of the National Utility Financial Statement (NUFS) model. Volume II: programmer's manual. (DOE/NBB—0072/2) (One-time) Jun 1985. 119p. NTIS DE85013090, $16.95

1984.

The computer code of the National Utility Financial Statement (NUFS) model is documented. NUFS is a financial model that projects on an annual basis financial variables for the electric utility industry. The NUFS computer code is described and listed. A brief discussion on compiling the NUFS code is presented. 2 tables, 2 figures.

99 Residential Transportation Energy Consumption Survey: consumption patterns of household vehicles 1983. (DOE/EIA—0464(83)) (Annual) Jan 1985. 108p. GPO Stock No. 061-003-00420-2, Domestic $4.50/Foreign $5.63; NTIS DE85005807

1982-1983.

Information on how energy is used by households for personal transportation is presented. These data are collected by the 1983 "Residential Transportation Energy Consumption Survey" (RTECS) to compare how energy is used in household vehicles with energy used in the home. RTECS collects data on the number and type of vehicles per household and, for each vehicle, annual miles traveled, gallons of fuel consumed, type of fuel used, price paid for fuel, and vehicle miles-per-gallon. A glossary is included, and a summary of findings is presented. Five appendixes discuss the survey methodology and limitations of the data as well as provide a copy of the survey forms and maps of U.S. weather zones and geographic areas. 24 tables, 3 figures.

100 Nonresidential Buildings Energy Consumption Survey: characteristics of commercial buildings 1983—a supplemental reference. (DOE/EIA—M008) (One-time) Jul 1985. 294p. NTIS DE85015581, $22.95

1983.

Technical support information for the 1983 Nonresidential Buildings Energy Consumption Survey is presented. This volume is a supplement to "Nonresidential Buildings Energy Consumption Survey: Characteristics of Commercial Buildings 1983" (DOE/EIA—0246(83)). Three sections provide percentages, relative standard errors for point estimates, and relative standard errors for percentages for the 39 tables in the parent report. A copy of the survey form is included. 117 tables.

101 Nonresidential Buildings Energy Consumption Survey: characteristics of commercial buildings 1983. (DOE/EIA—0246(83)) (Annual) Jul 1985. 208p. GPO Stock No. 061-003-00439-3, Domestic $7.50/Foreign $9.38; NTIS DE85015590

1979-1983.

Information from the 1983 Nonresidential Buildings Energy Consumption Survey (NBECS) is presented. The focus of this report is commercial buildings and their characteristics, energy sources, and conservation practices. A future report will cover data on fuel consumption and expenditures for these buildings. Data on industrial buildings are specifically excluded from this report, although they were presented in two reports from the 1979 NBECS. This report covers basic descriptions of commercial buildings, including principal activities, age/size of buildings, location, and occupancy patterns; energy sources used in commercial buildings; heating and cooling practices and equipment; and conservation practices. Some data are also provided for changes that occurred between 1979 and 1983. Appendixes discuss survey methodology, data quality, and building types. A glossary is included. 46 tables, 15 figures.

102 Assessment of the quality of selected EIA data series. Uranium and nuclear power data from 1977 to 1983. (DOE/EIA—M004) (One-time) Apr 1985. 147p. NEIC; NTIS DE85011090, $16.95

1977-1983.

Information on the quality of the Energy Information Administration's (EIA) uranium and nuclear power estimates is presented. This report is part of a series that assesses EIA's data and focuses on uranium exploration activity, uranium marketing activity, and capacity factors for nuclear power plants for the time period 1977-1983. The data from and structure of Forms EIA-717 and EIA-491 are assessed, with an emphasis on how the data series were designed, how the data series collection and tabulation procedures have changed over time, and how the data series compare with other similar series. 45 tables, 14 figures.

SUBJECT INDEX

The subject index is based on the use of subject descriptors selected from a controlled thesaurus of terms. Subject descriptors and qualifiers (subheadings) are selected and presented in the following format:

SUBJECT DESCRIPTOR

QUALIFIER

Title, (supplementary information), citation number, (report number)

The title may be supplemented with additional words, or a phrase, if it appears additional information would be helpful. In cases for which the title contains little or no information related to the subject entry, it may be replaced entirely by the supplementary information. A qualifier is not always required, and in such cases the title will follow the unqualified subject descriptor.

The descriptors selected for use as subject terms are generally the names of specific materials, things, or processes. To the extent possible, a qualifier is selected to describe the properties of, or processes applied to, the subject term.

Index entries are selected to indicate the important ideas and concepts presented in a document, rather than words that may appear in the text. Within the available thesaurus terms, the most probable or logical place to look for typical information is selected. "See references" are included to guide users from synonymous terms or phrases to the descriptor selected as a subject heading for the concept. (e.g. Pipeline Quality Gas see HIGH BTU GAS). "See also references" are used to indicate where to find references to subject concepts that are narrower, broader, or related to a particular subject heading. To complete an exhaustive search of a given subject, all such headings should be reviewed.

RECEIPTS

- Cost and quality of fuels for electric utility plants 1984, *67* (DOE/EIA—0191(84))
- Electric power annual 1984, *68* (DOE/EIA—0348(84))
- Electric power monthly, *58* (DOE/EIA—0226)
- Electric power quarterly, *69* (DOE/EIA—0397)
- Natural gas annual 1983. Volume I, *35* (DOE/EIA—0131(83)/1)
- Natural gas annual 1983. Volume II, *36* (DOE/EIA—0131(83)/2)

REGULATION

- Natural gas monthly, *34* (DOE/EIA—0130)

RESERVES

- Domestic natural gas reserves and production dedicated to interstate pipeline companies 1984, *33* (DOE/EIA—0167(84)P)
- Energy facts 1984, *53* (DOE/EIA—0469)
- Gas supplies of interstate natural gas pipeline companies 1984, *39* (DOE/EIA—0167(84))
- International energy annual 1984, *47* (DOE/EIA—0219(84))
- Natural gas annual 1983. Volume I, *35* (DOE/EIA—0131(83)/1)
- Natural gas annual 1984. Volume I, *37* (DOE/EIA—0131(84)/1)
- Petroleum resources of South America. Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, and Peru, *18* (DOE/EIA—0467)
- Profiles of foreign direct investment in U.S. energy 1983, *31* (DOE/EIA—0466)
- State energy overview 1983, *48* (DOE/EIA—0354(83))
- Statistics of interstate natural gas pipeline companies 1984, *40* (DOE/EIA—0145(84))
- U.S. crude oil, natural gas, and natural gas liquids reserves. 1984 annual report, *17* (DOE/EIA—0216(84))

RESIDENTIAL SECTOR

- State energy price and expenditure report 1970-1982, *49* (DOE/EIA—0376(82))

RESOURCE ASSESSMENT

- U.S. crude oil, natural gas, and natural gas liquids reserves. 1984 annual report, *17* (DOE/EIA—0216(84))

RESOURCE DEVELOPMENT

- Monthly energy review, *43* (DOE/EIA—0035)

RESOURCES
- Petroleum resources of South America. Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, and Peru, *18* (DOE/EIA—0467)

RETAIL PRICES
- International energy prices 1980-1984, *30* (DOE/EIA—0424(84))
- Monthly energy review, *43* (DOE/EIA—0035)
- Natural gas annual 1984. Volume I, *37* (DOE/EIA—0131(84)/1)
- Natural gas monthly, *34* (DOE/EIA—0130)
- Short-term energy outlook. Quarterly projections, *44* (DOE/EIA—0202)
- State energy price and expenditure report 1970-1982, *49* (DOE/EIA—0376(82))

SALES
- Natural gas monthly, *34* (DOE/EIA—0130)
- Statistics of interstate natural gas pipeline companies 1984, *40* (DOE/EIA—0145(84))

SUPPLY AND DEMAND
- Natural gas annual 1983. Volume I, *35* (DOE/EIA—0131(83)/1)
- Short-term energy outlook. Quarterly projections, *44* (DOE/EIA—0202)

TRADE
- International energy annual 1984, *47* (DOE/EIA—0219(84))

TRANSPORT
- Natural gas annual 1983. Volume I, *35* (DOE/EIA—0131(83)/1)
- Natural gas annual 1984. Volume I, *37* (DOE/EIA—0131(84)/1)

UNDERGROUND STORAGE
- Monthly energy review, *43* (DOE/EIA—0035)
- Natural gas annual 1983. Volume I, *35* (DOE/EIA—0131(83)/1)
- Natural gas annual 1984. Volume I, *37* (DOE/EIA—0131(84)/1)
- Natural gas monthly, *34* (DOE/EIA—0130)
- Short-term energy outlook. Quarterly projections, *44* (DOE/EIA—0202)
- Weekly petroleum status report, *26* (DOE/EIA—0208)

VALUE
- Natural gas annual 1983. Volume I, *35* (DOE/EIA—0131(83)/1)
- Natural gas annual 1984. Volume I, *37* (DOE/EIA—0131(84)/1)
- State energy overview 1983, *48* (DOE/EIA—0354(83))

NATURAL GAS DEPOSITS
- U.S. crude oil, natural gas, and natural gas liquids reserves. 1984 annual report, *17* (DOE/EIA—0216(84))

NATURAL GAS DISTRIBUTION SYSTEMS

Petroleum supply annual 1984. Volume 2, *28* (DOE/EIA—0340(84)/2)

RESIDENTIAL SECTOR
State energy price and expenditure report 1970-1982, *49* (DOE/EIA—0376(82))

RETAIL PRICES
International energy annual 1984, *47* (DOE/EIA—0219(84))
Short-term energy outlook. Quarterly projections, *44* (DOE/EIA—0202)
State energy price and expenditure report 1970-1982, *49* (DOE/EIA—0376(82))

SALES
Petroleum marketing monthly, *29* (DOE/EIA—0380)

SULFUR CONTENT
Electric power quarterly, *69* (DOE/EIA—0397)

SUPPLY AND DEMAND
Short-term energy outlook. Quarterly projections, *44* (DOE/EIA—0202)

TRANSPORT
Petroleum supply annual 1984. Volume 2, *28* (DOE/EIA—0340(84)/2)

TRANSPORTATION SECTOR
State energy price and expenditure report 1970-1982, *49* (DOE/EIA—0376(82))

PETROLEUM REFINERIES
Model documentation for the Oil Market Module of the Intermediate Future Forecasting System, *87* (DOE/EIA—M003)

CAPACITY
Annual energy review 1984, *51* (DOE/EIA—0384(84))
International energy annual 1984, *47* (DOE/EIA—0219(84))
Performance profiles of major energy producers 1983. Volume 1 analysis of trends, *24* (DOE/EIA—0206(83)/1)
Performance profiles of major energy producers 1983. Volume 2 statistical tables, *25* (DOE/EIA—0206(83)/2)
Petroleum supply annual 1984. Volume 2, *28* (DOE/EIA—0340(84)/2)
Petroleum supply monthly, *23* (DOE/EIA—0109)
Profiles of foreign direct investment in U.S. energy 1983, *31* (DOE/EIA—0466)
Weekly petroleum status report, *26* (DOE/EIA—0208)

COMPARATIVE EVALUATIONS
Performance profiles of major energy producers 1983. Volume 2 statistical tables, *25* (DOE/EIA—0206(83)/2)
Profiles of foreign direct investment in U.S. energy 1983, *31* (DOE/EIA—0466)

COMPETITION
Performance profiles of major energy producers 1983. Volume 1 analysis of trends, *24* (DOE/EIA—0206(83)/1)

ECONOMIC ANALYSIS
Performance profiles of major energy producers 1983. Volume 1 analysis of trends, *24* (DOE/EIA—0206(83)/1)

ENERGY MODELS
Refinery Evaluation Modeling System (REMS) database documentation (1985 update), *93* (DOE/EIA—M011)

FINANCIAL DATA
Performance profiles of major energy producers 1983. Volume 1 analysis of trends, *24* (DOE/EIA—0206(83)/1)
Performance profiles of major energy producers 1983. Volume 2 statistical tables, *25* (DOE/EIA—0206(83)/2)
Profiles of foreign direct investment in U.S. energy 1983, *31* (DOE/EIA—0466)

GASOLINE
Petroleum supply monthly, *23* (DOE/EIA—0109)

HEATING OILS
Petroleum supply monthly, *23* (DOE/EIA—0109)

INCOME
Performance profiles of major energy producers 1983. Volume 1 analysis of trends, *24* (DOE/EIA—0206(83)/1)
Performance profiles of major energy producers 1983. Volume 2 statistical tables, *25* (DOE/EIA—0206(83)/2)

INVENTORIES
Petroleum supply annual 1984. Volume 2, *28* (DOE/EIA—0340(84)/2)
Profiles of foreign direct investment in U.S. energy 1983, *31* (DOE/EIA—0466)

INVESTMENT
Performance profiles of major energy producers 1983. Volume 1 analysis of trends, *24* (DOE/EIA—0206(83)/1)
Performance profiles of major energy producers 1983. Volume 2 statistical tables, *25* (DOE/EIA—0206(83)/2)
Profiles of foreign direct investment in U.S. energy 1983, *31* (DOE/EIA—0466)

JET ENGINE FUELS
- Petroleum supply monthly, *23* (DOE/EIA—0109)

KEROSENE
- Petroleum supply monthly, *23* (DOE/EIA—0109)

LIQUEFIED PETROLEUM GASES
- Petroleum supply monthly, *23* (DOE/EIA—0109)

OPERATION
- Petroleum supply annual 1984. Volume 2, *28* (DOE/EIA—0340(84)/2)
- Petroleum supply monthly, *23* (DOE/EIA—0109)

PETROLEUM
- Petroleum supply monthly, *23* (DOE/EIA—0109)

PETROLEUM PRODUCTS
- Petroleum supply annual 1984. Volume 2, *28* (DOE/EIA—0340(84)/2)
- Petroleum supply monthly, *23* (DOE/EIA—0109)

PRODUCTION
- Annual energy review 1984, *51* (DOE/EIA—0384(84))

EIA REPORT NUMBER INDEX

(DOE/EI/19635-1) Trends in electric utility load duration curves. May 1985. 162p. NTIS DE85011451, $16.95 *56*

(DOE/EI/19656-1/1) Model documentation of the World Integrated Nuclear Evaluation System. Volume 1: model overview. Jul 1985. 18p. NTIS DE85015342, $9.95 *74*

(DOE/EI/19656-1/2) Model documentation of the World Integrated Nuclear Evaluation System. Volume 2: model description. Jul 1985. 43p. NTIS DE85015343, $9.95 *75*

(DOE/EI/19656-1/3A) Model documentation of the World Integrated Nuclear Evaluation System. Volume 3 part A: WINES data documentation. Jul 1985. 121p. NTIS DE85015344, $16.95 *76*

(DOE/EI/19656-1/3B) Model documentation of the World Integrated Nuclear Evaluation System. Volume 3 part B: WINES data documentation. Jul 1985. 132p. NTIS DE85015345, $16.95 *77*

(DOE/EI/19656-1/4) Model documentation of the World Integrated Nuclear Evaluation System. Volume 4: model abstract. Jul 1985. 20p. NTIS DE85015346, $9.95 *78*

(DOE/EI/19656-2) Oil Market Simulation model. Model documentation report. May 1985. 152p. NTIS DE85016246, $16.95 *79*

(DOE/EI/19656-3/1) International Nuclear Model. Volume I: overview. Mar 1985. 46p. NTIS DE86017214, $9.95 *80*

(DOE/EI/19656-3/2) International Nuclear Model. Volume II: data base relationships. Apr 1985. 234p. NTIS DE85017215, $28.95 *81*

(DOE/EI/19656-3/3A) International Nuclear Model. Volume III: program description part A. Jun 1985. 500p. NTIS DE85017217, $52.95 *82*

(DOE/EI/19656-3/3B) International Nuclear Model. Volume III: program description part B. Jun 1985. 500p. NTIS DE860000721, $16.95 *83*

(DOE/EI/19656-4) Short-Term Nuclear Annual Power Production Simulation documentation (SNAPPS). Sep 1985. 310p. NTIS DE86003474, $22.95 *84*

(DOE/EI/19656-5) Model documentation of the World Oil Supply model. May 1985. 100p. NTIS DE86003957, $11.95 *85*

(DOE/EIA—M002) Model documentation for the Mini-Macroeconomic Model: MINMAC. Jan 1985. 48p. NTIS DE85006325, $9.95 *86*

(DOE/EIA—M003) Model documentation for the Oil Market Module of the Intermediate Future Forecasting System. Jan 1985. 94p. NTIS DE85007056, $11.95 *87*

(DOE/EIA—M004) Assessment of the quality of selected EIA data series. Uranium and nuclear power data from 1977 to 1983. Apr 1985. 147p. NEIC; NTIS DE85011090, $16.95 *102*

(DOE/EIA—M005) Documentation of the Integrating Module of the Intermediate Future Forecasting System. Mar 1985. 136p. NTIS DE85010938, $16.95 *88*

(DOE/EIA—M006) Documentation of the Demand Analysis System database. Apr 1985. 42p. NTIS DE85011523, $9.95 *89*

(DOE/EIA—M007) Methodology description for the Well Completion Estimation Model. May 1985. 164p. NTIS DE85012335, $16.95 *90*

(DOE/EIA—M008) Nonresidential Buildings Energy Consumption Survey: characteristics of commercial buildings 1983—a supplemental reference. Jul 1985. 294p. NTIS DE85015581, $22.95 *100*

(DOE/EIA—M009) Model documentation report: Short-Term Integrated Forecasting System Demand Model 1985. Jul 1985. 84p. NTIS DE85015341, $11.95 *91*

(DOE/EIA—M010) Coal Supply and Transportation Model: user manual. Jul 1985. 68p. NTIS DE85015340, $11.95 *92*

(DOE/EIA—M011) Refinery Evaluation Modeling System (REMS) database documentation (1985 update). Aug 1985. 292p. NTIS DE86001261, $22.95 *93*

(DOE/EIA—M012) Fuel choice in steam electric generation: statistical analysis. Oct 1985. 246p. NTIS DE86000873, $22.95 *66*

(DOE/EIA—0035) Monthly energy review. Apr 1985. Issue (85/01), 140p. GPO subscription—Domestic $42.00/Foreign $52.50;Single issue—Domestic $3.75/Foreign $4.69; NTIS DE85009599 *43*

(DOE/EIA—0040(85)) Typical electric bills. January 1, 1985. Dec 1985. 260p. GPO Stock No. 061-003-00467-9, Domestic $9.00/Foreign $11.25 *59*

(DOE/EIA—0064(84)) Coal data: a reference. Jan 1985. 92p. GPO Stock No. 061-003-00421-1, Domestic $3.00/Foreign $3.75; NTIS DE85007271 *9*

MACHINE-READABLE DATA FILES AND MODELING PROGRAMS

The Energy Information Administration (EIA) has arranged for the National Technical Information Service (NTIS) to be its exclusive distributor for selected machine-readable energy data files and energy modeling programs (computer tapes). Detailed descriptions of the tapes and information on documentation and acquisitions can be obtained by contacting:

Stuart Weisman
National Technical Information Service
Office of Data Base Services
5285 Port Royal Road
Springfield, Virginia 22161
(703) 487-4808

All data file and modeling program tapes, except those noted with an asterisk, are priced at $160.00 each. Orders should include the PB numbers for each title requested. All files and models available on magnetic tape can be converted into diskette files. Please contact NTIS for current prices.

MODELING PROGRAMS

The models listed below are those currently utilized by the Energy Information Administration (EIA) for projecting and analyzing future flows of energy and energy products, their costs and prices, and the associated economic and other impacts for time periods ranging up to 40 years in the future. The term ''model'' refers to any procedure which is used to make forecasts or which quantifies a hypothesized relationship between dependent and independent variables.

MICROFICHE AVAILABILITY

Microfiche copies of all Energy Information Administration (EIA) publications are available to the public through the National Technical Information Service (NTIS). Please contact NTIS at the following address for specific availability and ordering information:

National Technical Information Service
Document Sales
5285 Port Royal Road
Springfield, Virginia 22161
(703) 487-4650

It is helpful to include the technical report number when ordering materials from NTIS.

EIA DATA COLLECTION FORMS

The Directory of Energy Data Collection Forms has been prepared by the Division of Data Collection Services, Office of Statistical Standards, as an authoritative listing of the public-use statistical forms currently used as basic information gathering tools by the Department of Energy (DOE), Energy Information Administration (EIA).

Originally entitled EIA Data Collection Forms, this Directory is designed to provide an overview of the Department's statistical data collection program for decisionmakers in Federal, State, and local governments. Each entry in the Directory contains a description, or abstract, of the form as well as certain frequently requested information. Included are the energy source(s) and function(s) covered by the form, the types of respondents, the legislative mandate authorizing the data collection, the publications resulting from the data collection, and the names of complementary data systems.

The Directory, as well as single blank copies of the forms listed, is available free of charge and can be obtained by contacting:

National Energy Information Center, EI-20
Energy Information Administration
Forrestal Building
Washington, D.C. 20585
(202) 252-8800

EIA PRODUCTS AND SERVICES

Energy Information Administration (EIA) publications encompass energy data reports of primary energy statistics, maps, analytical reports on energy situations, and projected energy sources, plus occasional special purpose reports. The EIA Publications Directory includes abstracts for publications released for printing in 1985.

Energy Facts, organized by energy source, provides a quick reference to a broad range of domestic and international energy data and sells for $1.50 per copy.

The National Energy Information Center in EIA also publishes, without charge, a bimonthly report, EIA Publications: New Releases, which contains up-to-date ordering information on new publications and forthcoming major reports. Also available free from EIA is the Energy Information Directory, which lists many government offices that are involved in energy matters, classifying them according to their specialties. Use Order Form C to be placed on the mailing list for these publications.

GOVERNMENT PRINTING OFFICE PRIORITY ANNOUNCEMENT SERVICE

In response to numerous requests on how to be informed when annual or one-time publications are available for sale, the Government Printing Office (GPO) maintains a priority announcement service for all Department of Energy (DOE) annual and one-time reports available from GPO. This service includes all Energy Information Administration (EIA) annual reports and one-time reports. This is a FREE service.

All energy titles are included in Code N562. Individuals may be added to the mailing list for this category and, when a new publication is available for sale, a notice will be sent with an order form. Please include the code number when you request this service. To be put on the mailing list contact:

Superintendent of Documents
U.S. Government Printing Office
Mail List Branch (Stop: SSOM)
Washington, DC 20402

HOW TO ORDER EIA PUBLICATIONS

To order EIA publications, first identify the distributing agency: the Government Printing Office (GPO), the National Energy Information Center (NEIC), or the National Technical Information Service (NTIS).

Please note separate order forms, marked A, B, C, D, and E.

To ensure expedient processing of your order(s), it is imperative to use the appropriate order form. Instructions for the use of the order forms follow.

A. EIA Publications Available on a Subscription Basis from GPO - Order Form A

To subscribe to an EIA publication available from GPO, use order form ''A.'' When placing your subscription order, always specify the publication title and include payment in full, charge, or deposit account information (see PAYMENT). Send completed order form to GPO at the address on the order form.

B. EIA Single Issues and Annual Publications Available from NEIC - Order Form B

To order single copies of EIA publications and/or annual EIA publications which are available from NEIC, use order form ''B.''

C. EIA Publications Available free from NEIC - Order Form C

To subscribe to EIA publications which are free, use order form ''C.'' Send the completed form to NEIC at the address on the order form.

D. EIA Publications Available from NTIS - Order Form D

To order publications available from NTIS, use order form ''D.'' Send the completed form to NTIS at the address on the order form. Always include payment in full, charge, or deposit account information with your order. In addition, NTIS has most EIA publications that are out-of-stock at GPO.

The following table shows NTIS prices according to their latest pricing codes.

NTIS PRICING CODES

Code	Price	Code	Price
A01	$ 5.95	A14	$28.95
A02	9.95	A15	28.95
A03	9.95	A16	28.95
A04	11.95	A17	28.95
A05	11.95	A18	34.95

A13	22.95		

A99 - Please ask for a price quote

E. To Notify NEIC of Change of Address or Cancellation of Mailing List Publications - Order Form E

To notify NEIC of a change in address or cancellation of a mailing list publication, use order form ''E.''

PAYMENT

GPO payments should be made by check or money order, payable to the Superintendent of Documents. GPO also accepts MasterCard and Visa credit cards. In addition, prepaid deposit accounts may be opened. GPO provides discounts for quantity purchases. Foreign mailings have a higher charge.

NTIS payments may be made by check, money order, or by American Express, MasterCard, or Visa credit cards. A deposit account with NTIS may also be opened. For the Convenience of its customers, NTIS also offers rush, priority, and ship and bill service at additional charge. Prices are slightly higher for foreign mailings.

TO BUY SINGLE ISSUES FROM NEIC

To order a single issue of a for-sale publication from NEIC, use the sales form below. Identify the publication by title, EIA document number, and price; allow 2 weeks for delivery. Receipt of payment is required before shipment. Payment may be made by Visa, MasterCard, Government Printing Office deposit account, check, or money order (payable to the Superintendent of Documents).

Order periodicals on subscription from GPO by using Form A
